Director, Division of Spent Fuel Management
Office of Nuclear Material Safety and Safeguards
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Attn: Document Control Desk

Subject: GEH Request for Renewal - Certificate of Compliance No. 9228 for the Model No. 2000 Package, Docket No. 71-9228

References: 1) Model No. 2000 Shipping Cask-Certification Number 9228 Rev. 26, Docket Number 71-9228, Package Identification USA/9228/B(U)F-96
2) GE Model 2000 Radioactive Material Transport Package High Flux Isotope Reactor (HFIR) Fuel Basket and Safety Liner Safety Analysis Report, NEDO-32229, Revision 1, August 2000.
3) GE Model 2000 Radioactive Material Transport Package MTR Type Fuel Divider and Tower Shielding Reactor (TSR) Fuel Basket Safety Analysis Report, NEDO-32408 Revision 2, May 2005.
4) GE Model 2000 Radioactive Material Transport Package 2000 Watts Decay Heat Upgrade Safety Analysis Report, NEDO-32318, Revision 1, May 2005.
5) GE Model 2000 Radioactive Material Transport Package Safety Analysis Report, NEDO-31581, Revision 1, May 2005.

Dear Sir or Madam:

GE Hitachi Nuclear Energy (GEH) hereby submits a request to renew NRC Certificate of Compliance (CoC) No. 9228 for the Model No. 2000 package. GEH has consolidated the Model No. 2000 Safety Analysis Report (SAR) and added a new package insert as an authorized configuration. In addition, GEH has removed package authorized contents described in two prior SAR's (References 2 and 3) and has re-performed specific structural, thermal, criticality, containment, and shielding evaluations to replace the Model No. 2000 packages other two SAR's (References 4 and 5).

The consolidated SAR is designated as NEDE-33866P Revision 0 and is provided as Attachment 2 to this letter. The SAR has been formatted consistent with NRC Regulatory Guide 7.9 "Standard Format and Content of Part 71 Packages for Radioactive Material" to aid NRC staff review and approval. Please note this version of the SAR contains company proprietary information and is requested to be withheld from public disclosure.

A redacted public version of the SAR designated as NEDO-33866 Revision 0 is provided as Attachment 3 to this letter.

The next Model 2000 use with the new package insert is scheduled in October 2016 and additional shipments are expected thru 2017. For this reason, GEH requests NRC review and issuance of the revised CoC by September 16, 2016.

Please contact Andreas Heppner at 910-819-5656 or myself, if there are questions regarding this request.

Sincerely,

Scott P. Murray, Manager
Facility Licensing

Attachment 1

GE-Hitachi Nuclear Energy

AFFIDAVIT

I, **Scott P. Murray**, state as follows:

- (1) I am the Manager, Facility Licensing of GE-Hitachi Nuclear Energy (GEH) and have been delegated the function by GEH of reviewing the information described in paragraph (2) which is sought to be withheld, and have been authorized to apply for its withholding.
- (2) The information sought to be withheld is contained in Attachment 2 to GEH's letter, SPM 16-015, Scott P. Murray to Director, Division of Spent Fuel Management entitled GEH Request for Renewal - Certificate of Compliance No. 9228 for the Model No. 2000 Package, Docket No. 71-9228. GEH proprietary information is contained in Attachment 2, and is identified by the statement "GE Hitachi Proprietary Information".
- (3) In making this application for withholding of proprietary information of which it is the owner or licensee, GEH relies upon the exemption from disclosure set forth in the Freedom of Information Act (FOIA), 5 USC Sec. 552(b)(4), and the Trade Secrets Act, 18 USC Sec. 1905, and NRC regulations 10 CFR 9.17(a)(4), and 2.390(a)(4) for trade secrets (Exemption 4). The material for which exemption from disclosure is here sought also qualifies under the narrower definition of trade secret, within the meanings assigned to those terms for purposes of FOIA Exemption 4 in, respectively, Critical Mass Energy Project v. Nuclear Regulatory Commission, 975 F2d 871 (DC Cir. 1992), and Public Citizen Health Research Group v. FDA, 704 F2d 1280 (DC Cir. 1983).
- (4) The information sought to be withheld is considered to be proprietary for the reasons set forth in paragraphs (4)a. and (4)b. Some examples of categories of information that fit into the definition of proprietary information are:
 - a. Information that discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by GEH's competitors without license from GEH constitutes a competitive economic advantage over GEH and/or other companies.
 - b. Information that, if used by a competitor, would reduce their expenditure of resources or improve their competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing of a similar product.
- (5) To address 10 CFR 2.390(b)(4), the information sought to be withheld is being submitted to the NRC in confidence. The information is of a sort customarily held in confidence by GEH, and is in fact so held. The information sought to be withheld has, to the best of my knowledge and belief, consistently been held in confidence by GEH, not been disclosed publicly, and not been made available in public sources. All disclosures to third parties, including any required transmittals to the NRC, have been made, or must be made, pursuant to regulatory provisions or proprietary and/or confidentiality agreements that provide for maintaining the information in confidence. The initial designation of this information as proprietary information, and the subsequent steps taken to prevent its unauthorized disclosure are as set forth in the following paragraphs (6) and (7).
- (6) Initial approval of proprietary treatment of a document is made by the manager of the originating component, who is the person most likely to be acquainted with the value and sensitivity of the information in relation to industry knowledge, or who is the person most likely to be subject to the terms under which it was licensed to GEH.
