Statement of Work

**U.S. Nuclear Regulatory Commission
Office of the Chief Financial Officer
Division of Planning and Budget**

Title: Agency-Wide Programmatic Internal Control Support

1.0 Background

The U.S. Nuclear Regulatory Commission (NRC) Office of the Chief Financial Officer (OCFO) is responsible for coordination and oversight of the agency's Programmatic Internal Control Program. The NRC is currently improving its Programmatic Internal Control Program by incorporating Federal best-practices.

2.0 Objective

Contractor shall provide independent analysis, expert advice, and onsite support to facilitate the implementation of an agency-wide, streamlined, standardized, and improved programmatic internal control framework. The implementation of this framework will help ensure the NRC is in substantial compliance with the Federal Managers' Financial Integrity Act of 1982 (FMFIA), as well as Office of Management and Budget (OMB) and General Accountability Office (GAO) guidelines.

3.0 Scope of Work

General Requirements

The Contractor shall provide assistance and expert advice in the implementation of NRC's new programmatic internal control framework, including the development and facilitation of risk assessments, development of internal control plans, memoranda of understanding, communication plans, assistance with the development and facilitation of an internal control working group and senior management internal control team, and shall provide direct, onsite support to NRC management and key staff during the transition to the new framework.

The Contractor shall provide the necessary personnel, equipment, and management, to meet the requirements of this statement of work.

Specific Scope

Task 1: Kickoff Meeting (Base Period)

REQUIREMENT: The Contractor shall attend a one-time kick-off meeting at the NRC Headquarters in Rockville, MD, to discuss the project plan, milestones, step-by-step details on framework implementation, and due dates.

DELIVERABLE: Kick-off meeting shall be held within three (3) working days of task order award.

Task 2: Project/Framework Implementation Plan (Base Period)

REQUIREMENT: The Contractor shall develop and submit to the Contracting Officer's Representative (COR), a detailed Project/Framework Implementation Plan (Plan), including a step-by-step breakdown of how the framework will be implemented from start to completion.

The Plan shall include a description of the Contractor's approach to implement NRC's new programmatic internal control framework, including the development and facilitation of risk assessments, development of internal control plans, memoranda of understanding among reasonable assurance information sources and the assessable unit manager (business line lead), communication plan to engage NRC management and staff, assistance with the development and facilitation of an internal control working group and senior management internal control team, and its approach to providing onsite support in Rockville, Maryland, to NRC management and key staff during the transition to the new framework.

Using GAO Standards for Internal Control in the Federal Government as a guide, and conforming to FMFIA, OMB Circular A-123, *Management's Responsibility for Internal Control*, and other applicable Federal requirements, the Plan shall also:

- Describe the Contractor's approach for changing from the current framework to the new framework: the tasks to be performed, the methodology for accomplishing the change, and how the benefits will be measured;
- Link the outcomes of the Programmatic Internal Control Program to the agency's mission and strategic objectives;
- Provide a detailed, step-by-step breakdown, both in written format and in Visio process flows, of how the framework will be implemented;
- Use workflow charts, cost-benefit analysis, and other tools, as necessary, to show the effect of the Plan on business processes and human capital management;
- Include the agreed upon milestones and schedule.

The NRC plans to pilot the new framework with three assessable units beginning in Quarter 4 of Fiscal Year (FY) 2012, and fully deploy the framework to the rest of the agency in FY 2013.

According to GAO, any approach that omits the substance of the steps shown in Figure 1 is likely to have material weaknesses. Therefore, the Plan shall address all steps of the GAO risk management framework. (See next page)

DELIVERABLES:

- Outline due no later than (NLT) three (3) working days after kick-off meeting.
- Draft Plan due NLT five (5) working days after receipt of approved outline from the COR.
- Final Project/Framework Implementation Plan due NLT five (5) working days after receipt of approved draft plan from the COR. The final project plan shall encompass a detailed, step-by-step procedural breakdown of the new framework's implementation.

The COR may request deliverables be submitted electronically, on CD, and/or in hard copy. The COR shall reserve the right to request additional information as needed.

NRC Furnished Materials: The COR will provide the assessable unit structure, risk assessment questionnaire used previously, and reasonable assurance certification.

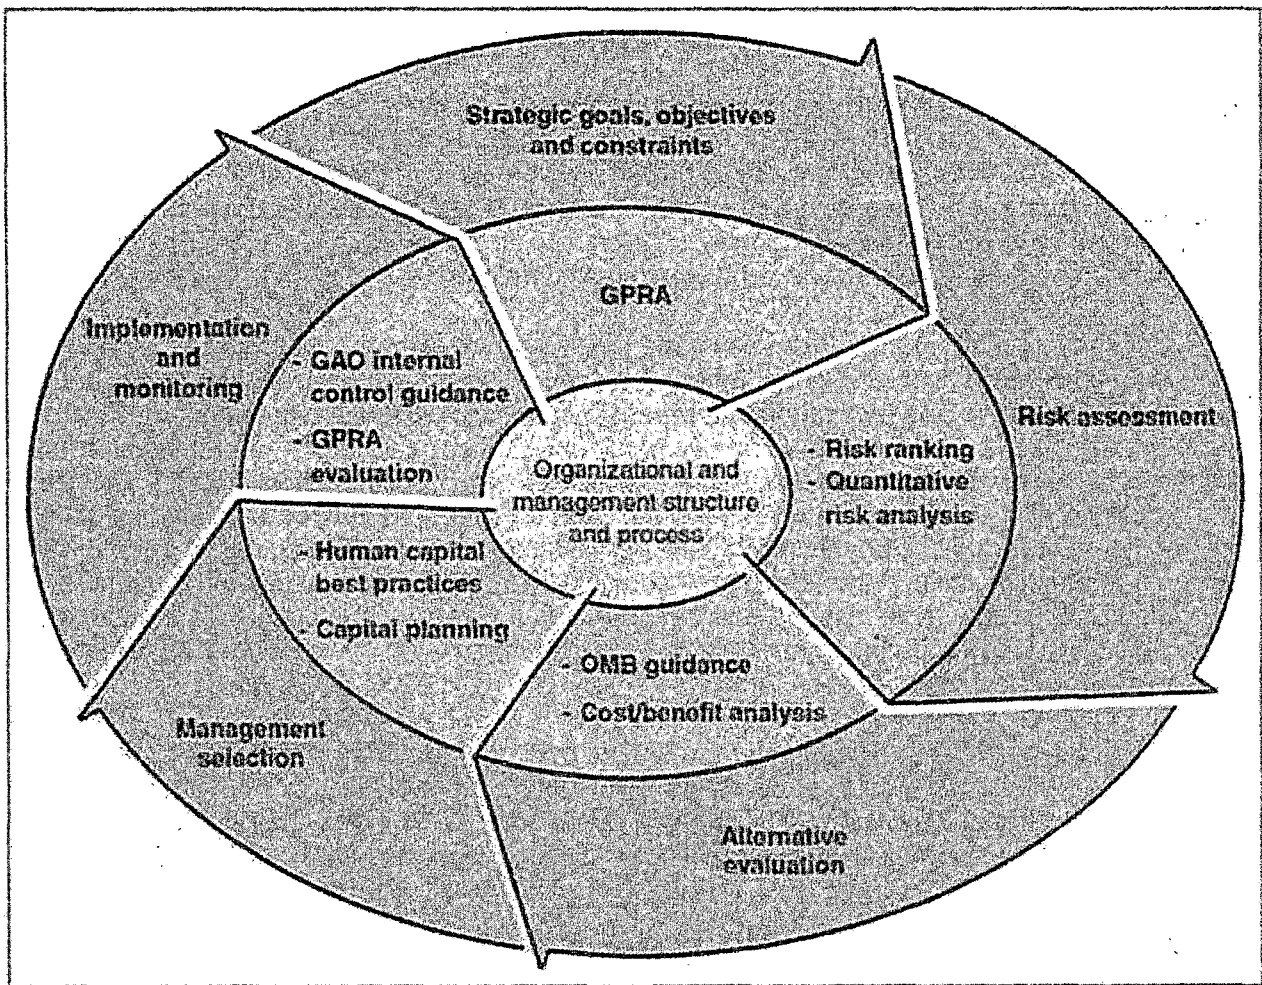

Figure 1: Sources of Evaluation Criteria Associated with Risk Management Phases
Source: GAO

Task 3: Provide Support (Onsite and Offsite) for Three NRC Assessable Units Participating in a Pilot of the New Programmatic Internal Control Framework (Base Period)

REQUIREMENT: The Contractor shall provide support (onsite in Rockville, Maryland, and via phone, email, memoranda, presentations, and other vehicles) for three Assessable Units during the pilot program of the new programmatic internal control framework. The Contractor shall be knowledgeable of NRC's mission, performance goals, and business processes.

The Contractor shall provide support to the assessable unit managers, key staff, and COR during the pilot of the new programmatic internal control framework. This support shall include, but not be limited to:

- Drafting memoranda of understanding (MOUs) between assessable unit managers (business line leads) and partner offices/regions, other business line leads, and/or product line owners to ensure that assessable unit managers (business line leads) have the appropriate types and levels of information to support the annual reasonable assurance certification. Gather the information for the MOUs from the assessable unit managers/key staff, partner offices/regions, other business line leads, and/or product line owners as

GS23F8077H NRC-HQ-12-F-09-0003

necessary for all three assessable units. Provide a reusable MOU template and a method statement to show how the work was completed;

- Drafting a separate, distinct risk assessment questionnaire for each of the assessable units. The questionnaire shall contain approximately 25 to 50 standard questions and approximately 15 to 25 questions tailored to each assessable unit. Determine the 15 customized questions as a result of interviewing NRC employees with technical expertise and working knowledge of the business processes of the assessable unit. Provide a method statement to show how the work was completed;
- Using each customized risk assessment questionnaire, conduct a facilitated risk assessment with each of the assessable unit managers and key staff; the risk assessment shall address the identification and evaluation of inherent risks to the assessable unit manager and agency's ability to achieve its strategic goals and objectives; identify potential events which may adversely affect desired outcomes; evaluate events based on likelihood of occurrence and impact; identify high risks and a prioritized risk management strategy; identify actions to mitigate or reduce risk based on results of the risk assessments; identify the benefits of managing risk, including a cost-benefits analysis; and define processes for continuous identification and evaluation of inherent risks since governmental, economic, industry, legislative, and operating conditions continually change. Provide a method statement to show how the work was completed;
- Meeting with assessable unit managers and key staff upon the request of the COR to answer questions, interview and obtain information, and provide expertise and guidance during the transition. The NRC estimates approximately 75 onsite meetings of approximately two to four (2 - 4) hours each during the base period of the task order; and
- Reviewing the Internal Control Working Group (ICWG) charter and providing feedback to finalize the charter; supporting the ICWG by preparing agendas, documenting action items, and facilitating meetings as requested by the COR.

DELIVERABLES:

- Written review/feedback on charter document for Internal Control Working Group – due two (2) working days after Final Project/Framework Implementation Plan.
- Internal Control Working Group – first meeting to be held NLT September 12, 2012.
- Pilot for assessable unit 1 [includes customized risk assessment questionnaire, facilitated risk assessment, MOUs to support reasonable assurance (as many memos as needed according to the assessable unit managers and key staff), reusable MOU template, and method statement to show how the work was completed] – Pilot 1 to be completed May 10, 2013.
- Visio process flows to illustrate how the complete processes and inputs/outputs of the new internal control framework will function, including what communications are necessary for the processes to function, who are the sources/recipients, and the respective timeframes – due May 31, 2013.
- Pilot for assessable unit 2 [includes customized risk assessment questionnaire, facilitated risk assessment, MOUs to support reasonable assurance (as many memos as needed according to the assessable unit managers and key staff), and method statement to show how the work was completed] – Pilot 2 to be completed May 10, 2013.
- Pilot for assessable unit 3 [includes customized risk assessment questionnaire, facilitated risk assessment, MOUs to support reasonable assurance (as many memos as needed according to the assessable unit managers and key staff), and method statement to show how the work was completed] – Pilot 3 to be completed May 10, 2013.

GS23F8077H NRC-HQ-12-F-09-0003

- Emphasis: Constructive support (including onsite in Rockville, Maryland) to the three assessable units during the pilot program is an essential component of this task.

The COR may request deliverables be submitted electronically, on CD, and/or in hard copy. The COR shall reserve the right to request additional information as needed.

Task 4: Rollout - Provide Support (Onsite and Offsite) for Full Implementation of the New Programmatic Internal Control Framework throughout the Rest of NRC (Base Period)

REQUIREMENT: The Contractor shall provide support (onsite in Rockville, Maryland, and via phone, email, memoranda, presentations, and other vehicles) for all remaining Assessable Units (12 units) during the rollout of the new programmatic internal control framework.

Provide support to the assessable unit managers, key staff, and COR during the implementation of the new programmatic internal control framework.

This support shall include, but not be limited to:

- Drafting memoranda of understanding (MOUs) between assessable unit managers (business line leads) and partner offices/regions, other business line leads, and/or product line owners to ensure they have the appropriate types and levels of information to support the annual reasonable assurance certification. Gather the information for the MOUs from the 12 assessable unit managers/key staff, partner offices/regions, other business line leads, and/or product line owners as necessary. Provide a method statement to show how the work was completed;
- Drafting a separate, distinct risk assessment questionnaire for each of the 12 assessable units. The questionnaire shall contain 35 standard questions and 15 questions tailored to each assessable unit. Determine the 15 customized questions as a result of interviewing NRC employees with technical expertise and working knowledge of the business processes of the assessable unit. Provide a method statement to show how the work was completed;
- Conducting a facilitated risk assessment with each of the remaining 12 assessable unit managers and key staff; the risk assessment shall address the identification and evaluation of inherent risks to the assessable unit manager and agency's ability to achieve its strategic goals and objectives; identify potential events which may adversely affect desired outcomes; evaluate events based on likelihood of occurrence and impact; identify high risks and a prioritized risk management strategy; identify the benefits of managing risk, including a cost-benefits analysis; and define processes for continuous identification and evaluation of inherent risks since governmental, economic, industry, legislative, and operating conditions continually change. Provide a method statement to show how the work was completed;
- Meeting with assessable unit managers and key staff upon the request of the COR to answer questions, interview and obtain information, and provide expertise and guidance during the transition and the FY 2013 reasonable assurance process; and
- Facilitating the Internal Control Working Group and/or attending meetings as requested by the COR.

DELIVERABLES:

- Rollout of all remaining assessable units [includes for each unit a customized risk assessment questionnaire, facilitated risk assessment, internal control plan, and MOUs to support reasonable assurance (as many memos as needed according to the assessable unit managers and key staff), and method statement to show how the work was completed] – **Rollout to be completed September 30, 2013.**
- Emphasis: Constructive support to assessable units during implementation and continued support of the three pilot units is an essential component of this task.

Task 5: Internal Control Plans (plan for each Assessable Unit and an Agency-Wide Plan) (Base Period and Option Periods)

REQUIREMENT: The Contractor shall prepare standardized, comprehensive annual Internal Control Plans for all assessable units and an Agency-Wide Multi-Year Internal Control Plan. To complete this task, the Contractor shall:

- Define a standardized, comprehensive format for the Internal Control plan. The format shall have the same level of detail for all assessable units;
- Populate the Internal Control plans for all assessable units based on information obtained from the assessable unit managers, key staff, and risk assessment information. The plan will be a section of the business line quarterly reporting. Obtain acceptance of the internal control plans from the assessable unit managers; and
- Include a 5-year look-ahead to list any planned internal and external assessments for the next five years. These look-aheads will be used as the basis for the Agency-Wide Multi-Year Internal Control Plan, and therefore each assessable unit needs to have at least one assessment during a 5-year period.

DELIVERABLES:

- Internal Control Plan template due July 31, 2013.
- Completed Internal Control plans for all assessable units due September 30, 2013.
- Agency-Wide Multi-Year Internal Control plan, or documentation applicable to agency-wide Internal Control items due July 31, 2014.

Task 6: Project Status Reports (Base Period and Option Periods)

REQUIREMENT: The Contractor shall provide the COR and the Contracting Officer (CO) monthly status reports by the 15th calendar day of the each month. The Contractor shall participate in a weekly phone conference on project status.

DELIVERABLE: The status report will identify the reporting period, summarize each month's work progress, list monthly spending, total spending to date, and the funds remaining. Any administrative or technical difficulties which may affect the schedule or costs of the project shall be immediately brought to the attention of the COR.

Submit a copy of the status report to the following mailboxes:

Adelis.Rodriguez@nrc.gov

Elizabeth.Bowlin@nrc.gov

Michelle.Curtis@nrc.gov

Task 7: Provide Support (Onsite and Offsite) for Post-Implementation for the New Programmatic Internal Control Framework (Option Periods)

REQUIREMENT: The Contractor shall provide continued support (onsite in Rockville, Maryland, and via phone, email, memoranda, presentations, and other vehicles) to all assessable unit managers, key staff, and COR after the implementation is complete for the new programmatic internal control framework.

This support shall include, but not be limited to:

- Supporting the management control reviews of cross-cutting product lines and centralized corporate support activities by developing a detailed plan customized to each product line, including a step-by-step breakdown of how the reviews will be conducted and documented from start to completion, and description of the specific standards which the review process is following. NRC estimates two (2) product lines and two (2) corporate support activities to be reviewed during FY 2015. NRC estimates one (1) product line and one program to be reviewed during FY 2016. NRC estimates three (3) biennial reviews in FY 2016, and the Contractor will review these biennial reviews when requested.
- Updating the risk assessment questionnaire(s) and the risk assessment(s) if there have been changes to external requirements, new assessable units, adverse occurrences, program or operational changes, etc.;
- Update the Internal Control (IC) database to capture the modified Internal Control Plan (ICP) template with functionality to produce updated forms and reports.
- Update IC database user guide.
- Database support as needed;
- Draft Budget Formulation Desktop Procedures Guide for the budget formulation branch.
- Continued status reporting as described in Task 6;
- Advice on approaches and best practices that other Federal agencies will take to meet the updates from GAO and OMB, when those updates are issued. Support to ICPB in updating Management Directive (MD) 4.4, Internal Control; and
- Continued support to the COR and assessable unit managers as the agency follows GAO's *Internal Control Management and Evaluation Tool*, GAO-01-1008G (August 2001) to verify and document that:

Mechanisms are in place to identify changes that may affect the agency's ability to achieve its missions, goals, and objectives.

Appropriate policies, procedures, techniques, and control mechanisms have been developed and are in place to ensure adherence to established directives; proper control activities have been developed for each of the agency's activities; and the control activities identified as necessary are actually being applied properly.

Information systems are in place to identify and record pertinent operational information relating to internal and external events. That information is communicated to management and others within the agency who need it and in a form that enables them to carry out their duties and responsibilities efficiently and effectively. Management ensures that effective internal communications take place. It also ensures that effective external communications occur with groups that can affect the achievement of the agency's missions, goals, and

GS23F8077H NRC-HQ-12-F-09-0003

objectives. The agency employs various forms of communications appropriate to its needs and manages, develops, and revises its information systems in a continual effort to improve communications.

Agency internal control monitoring assesses the quality of performance over time. It does this by implementing procedures to monitor internal control on an ongoing basis as a part of the process of carrying out its regular activities. It includes ensuring that managers know their responsibilities for internal control and control monitoring. In addition, separate evaluations of internal control are periodically performed and the deficiencies found are investigated. Procedures are in place to ensure that the findings of all audits and other reviews are promptly evaluated, decisions are made about the appropriate response, and actions are taken to correct or otherwise resolve the issues promptly.

DELIVERABLES:

- Proposed ERM Implementation Framework
- Risk Review Questionnaire for upcoming Risk Assessment w/NMSS (HLW) and Risk Assessment Facilitation
- Updated Draft of MD 4.4
- Updated IC Database and Users Guide
- Draft Budget Formulation Desktop Procedure Guide

Task 8: Documentation (Base Period)

REQUIREMENT: The Contractor shall develop and submit documentation support, including desktop procedures on the work processes for programmatic internal control at NRC and documents necessary for the program as directed by the COR,

DELIVERABLES:

- Desktop Procedures Handbook, and process charts and maps due December 31, 2013.
- Deliverables as necessary to document, communicate, and illustrate the project to update the framework for NRC's Programmatic Internal Control Program – due December 31, 2013.

The COR may request deliverables be submitted electronically, on CD, and/or in hard copy. The COR shall reserve the right to request additional information as needed.

Task 9: Database (Base Period)

REQUIREMENT: The Contractor shall develop and submit to the COR a database in Microsoft Access to organize the voluminous information gathered during the risk assessment process. Contractor shall work with the COR to develop the requirements for what the final application does, how the forms look, and what is included in the reports. Before proceeding with development, contractor shall request COR's approval of database plan to fit the purpose. Contractor shall use development standards and include all three phases of conceptual, logical, and physical database design.

Contractor shall design the database with attention to the following:

- Performance needs of the application;
- Confidentiality, integrity, and availability of data; and
- Security requirements of the database and user permissions.

GS23F8077H NRC-HQ-12-F-09-0003

Contractor shall ensure that the database:

- Can represent all expected data over time;
- Avoids redundancy and ensures consistency;
- Provides efficient access to data; and
- Supports the maintenance of data integrity over time.

DELIVERABLES:

The database plan (to fit the purpose), requirements specification, database, data dictionary, reports, and user guide – due TBD and NLT December 31, 2013.

The COR may request deliverables be submitted electronically, on CD, and/or in hard copy. The COR shall reserve the right to request additional information as needed.

4.0 Labor Categories/Personnel Qualifications

It is anticipated that the following labor categories will be required: (1) Senior Project Manager, (2) Subject Matter Expert III, (3) Senior Auditor, (4) Staff Auditor, (5) Technical Writer, and (6) Associate 1. The contractor shall provide personnel that meet the minimum qualifications stated below. All personnel proposed are considered to be key personnel, except the Associate 1 labor category.

(1) Senior Project Manager (PM). The PM shall possess, at a minimum, a four-year degree and shall have five (5) years of project-management-related experience in Government and/or private sector. A business degree and a Project Management Professional (PMP) certification are relevant and will be considered, though they are not required.

(2) Subject Matter Expert III (SME3). The SME3 shall possess, at a minimum, a four-year degree and shall have at least seven (7) years of experience related to risk management and Federal Government programmatic internal controls. The following professional certifications are relevant and will be considered, though they are not required: Certified Public Accountant (CPA), Certified Information Systems Auditor (CISA), Certified Information Security Manager (CISM), Certified Government Financial Manager (CGFM), Certified Internal Auditor (CIA), Certified Government Auditing Professional (CGAP).

(3) Senior Auditor. The Senior Auditor shall possess, at a minimum, a four-year degree and shall have at least seven (7) years of auditing experience.

(4) Staff Auditor (Auditor). The Auditor shall possess a four-year degree and shall have at least five (5) years of experience in auditing, analysis, or accounting.

(5) Technical Writer. The Technical Writer shall have at least five (5) years of experience in preparing, drafting, reviewing, revising, or editing plans, documents, or reports.

(6) Associate 1 (Non-Key Personnel) shall support Task 4, Implementation; Task 6, Status Reports; Task 8, Documentation; and Task 9, Database; all during the Base Period. To use funds more efficiently, Associate 1 shall process and produce documents and spreadsheets, take notes at informational interview meetings, coordinate calendar items, and provide pertinent support for the program. Associate 1 shall possess a four-year degree and have experience using Microsoft Office (Word, Excel, Access, Outlook) to work with documents, spreadsheets, and databases.

In addition, the Contractor shall prepare a staffing plan that identifies the proposed organizational resources to be dedicated to the effort, including staffing at the task level.

5.0 Place of Performance

Work for this task will be performed primarily at the Contractor's site, using email, telephone, and conference calls to accomplish routine contacts with the COR and NRC staff. However, when required, or at the request of the COR, the Contractor shall travel to the NRC headquarters site to provide hands-on support to NRC managers, staff, and the COR. Such support shall include: facilitation of risk assessments with assessable unit managers; facilitation of internal control working group meetings; interviewing NRC managers and key staff to obtain information necessary to support the development of memoranda of understanding, internal control plans and reasonable assurance certifications.

6.0 Deliverables

Deliverable (for a detailed description of deliverable requirements, see Section 3, Scope of Work)	Due Date
Kick-Off Meeting	Complete
Project/Framework Implementation Plan	Outline Complete Draft Plan Complete Final Plan Complete
Internal Control Working Group (ICWG): Review charter and provide feedback to finalize document	Complete
ICWG: Facilitate the establishment and first meeting	Complete
Pilot for Assessable Unit 1	Complete
Visio process flows	Complete
Pilot for Assessable Unit 2	Complete
Pilot for Assessable Unit 3	Complete
Rollout in FY2013 of all remaining Assessable Units (12 units)	Complete
Template for standardized Internal Control Plan	Complete
Internal Control Plan for each Assessable Unit (15 units total)	Complete
Method Statement	Complete
Annual Risk Review Checklist	Complete
Desktop Procedures Handbook; process charts and maps	Complete
Database plan (to fit the purpose), requirements specification, database, data dictionary, reports, and user guide	Complete

GS23F8077H NRC-HQ-12-F-09-0003

Deliverable (for a detailed description of deliverable requirements, see Section 3, Scope of Work)	Due Date
Objectives and scope questions document for management control reviews for FY15	Complete
General presentation slides and talking points, approx. 10 mins.	Complete
Communications Strategy	Ongoing through August 16, 2016
Training materials to support the supervisor training session	NLT March 31, 2016
Supervisor training session slides, talking points, and in-person delivery of training, approx. 3 hours	NLT March 31, 2016
Support in risk review and risk assessments of programmatic changes	Ongoing through August 16, 2016
Advice on approaches and best practices that other Federal agencies will take to meet the updates from GAO and OMB	Dependent upon issuance of revised OMB Circular A-123, ongoing through August 16, 2016
Support in updating MD 4.4, Internal Control	Dependent upon issuance of revised OMB Circular A-123, ongoing through August 16, 2016
Desktop Procedures Handbooks for branch work activities	Fee Policy Desktop Procedures - Draft Completed January 31, 2015 PAR Desktop Procedures - Completed September 29, 2015 Performance Measures Desktop Procedures - Completed May 2015 Update Desktop Procedures for ICPB Staff - Completed Budget Formulation Desktop Procedure Guide - TBD
Project Status Report	Monthly – by the 15th calendar day of the following month
Project Status Phone Conference	Weekly

7.0 Travel

Occasional travel to and from the NRC Headquarters facility is required, as discussed previously in this document. The Contractor shall not be reimbursed for any travel under this task order. NRC has four regional offices located throughout the country, and the Contractor is expected to use phone and/or video conferences to obtain information, as needed, from these regional offices.

During the base period of the contract, the NRC estimates approximately 75 onsite meetings of approximately two to four (2 - 4) hours each.

During the option three period of the contract, the NRC estimates approximately 24 onsite meetings of approximately one to three (1 - 3) hours each.

8.0 NRC Furnished Material

The COR will provide the Programmatic Internal Control Program framework sponsored by the agency's Executive Committee on Internal Control.

9.0 Expected Classification or Sensitivity

All work under this project is unclassified and not sensitive.

10.0 Designation of COR

Primary COR:

Michelle Curtis, PMP, Contracting Officer Representative
U.S. Nuclear Regulatory Commission
Mail Stop T9-D24
Washington, DC 20555-0001
Telephone: 301-415-7607
Fax: 301-415-5386
Email: Michelle.Curtis@nrc.gov

Alternate COR:

Elizabeth Bowlin, CISM, Alternate Contracting Officer Representative
U.S. Nuclear Regulatory Commission
Mail Stop T9-D24
Washington, DC 20555-0001
Telephone: 301-415-5891
Fax: 301-415-5386
Email: Elizabeth.Bowlin@nrc.gov

Express mail should be sent to:

U. S. Nuclear Regulatory Commission
Mail Stop T9-D24
11545 Rockville Pike
Rockville, MD 20852-2738

2. The revised Price/Cost Schedule is as follows:

Price/Cost Schedule Base and all Options 08/17/2012 – 08/16/2016

CLIN	NRC Labor Category	GSA Labor Category	HRS including all options	(Decrease) /Increase	Revised Est. Hours	Rate	Total
006	Senior Project Manager	Executive Associate	1026 hrs	-95 hrs	931 hrs	\$125.00	\$116,375.00
007	Subj. Matter Expert III	Senior Associate 1	642 hrs	-40 hrs	602 hrs	\$135.89	\$81,805.78
008	Senior Auditor	Senior Associate 2	2323 hrs	+284.45 hrs	2607.45 hrs	\$125.00	\$325,931.25
