SUBJECT: SUMMARY OF A PUBLIC MEETING WITH SOUTHERN NUCLEAR  
OPERATING COMPANY AND SOUTH CAROLINA ELECTRIC & GAS  
ON APRIL 14, 2016

The U.S. Nuclear Regulatory Commission (NRC) staff held a Category 2 public meeting with Southern Nuclear Operating Company (SNC) and South Carolina Electric & Gas (SCE&G) on April 14, 2016. The purpose of the meeting was to discuss issues associated with the safety review of licensing actions for SNC's Vogtle Electric Generating Plant (VEGP) Units 3 and 4, and SCE&G's Virgil C. Summer Nuclear Station (VCSNS) Units 2 and 3.

The meeting notice can be found in the Agencywide Documents Access and Management System (ADAMS) under Accession Number ML16095A156. The meeting notice is also posted on the NRC public website. Enclosures 1 and 2 are the meeting agenda and attendance list for the meeting, respectively. The other documents referenced during the discussion can be found at the ADAMS Accession Numbers given below:

Summary of Meeting:

On April 14, 2016, staff from the NRC conducted a public meeting with representatives from SNC and SCE&G to discuss issues associated with the safety review of licensing actions for SNC's VEGP Units 3 and 4, and SCE&G's VCSNS Units 2 and 3. Specifically, the meeting discussed (1) N-line wall tolerances at VEGP follow-up discussion from the April 7, 2016, public meeting, (2) VEGP's and VCSNS's shield building roof beams procurement issues, and (3) nondestructive examination (NDE) for welds joining couplers to stainless and carbon steel embedment plates at VEGP and VCSNS.

In the open portion of the meeting, the first topic discussed was N-line wall tolerances at VEGP. The staff reviewed the qualitative impact assessment on the VEGP global seismic model due to proposed changes to Wall N (ADAMS Accession No. ML16098A314), and as a follow-up to the April 7, 2016, public meeting, noted that they identified no major issues with SNC's proposal. SNC will proceed to submit the license amendment request (LAR), and the NRC staff will perform a more detailed review at that time and if necessary, issue associated requests for additional information (RAIs).

The second topic discussed was the shield building roof beams at the VEGP and VCSNS. The licensees, through their vendor, Westinghouse Electric Company (WEC), walked through the pre-submittal public meeting slides, explaining that the shield building roof beam sizes specified in the licensing basis for VEGP and VCSNS cannot be procured with acceptable material and its test requirements. WEC explained that the proposed resolution for this LAR includes using W36x395 instead of the specified W36x393 for the beams that support the concrete roof of the shield building and allowing built up plate girders to be a substitute for the W36x395 and W36x135 rolled beams. The staff asked about other proposed changes to the shield building and if a global analysis of all the changes has been considered. WEC noted that the cumulative effects of the design changes are being evaluated and that additional design changes are included in this LAR (WEC LAR-74) to describe the impacts on the existing analysis. The staff stated that they did not have any additional questions about this portion of the LAR and that they expect to discuss the LAR in its entirety in a future public meeting.

The third topic discussed was the NDE for welds joining couplers to stainless and carbon steel embedment plates at VEGP and VCSNS. The licensees, through their vendor, WEC, described the nonconformance as, contrary to American Institute of Steel Construction (AISC) N690-1994, Q1.26 magnetic particle (MT) or liquid penetrant (PT) examination requirements, populations of stainless and carbon steel embedment plates were installed at VEGP and VCSNS without requisite NDE having been performed. WEC presented the proposed resolution details, including four LARs (two for VEGP and two for VCSNS), to demonstrate that, while not in conformance with AISC N690-1994 requirements for NDE, the coupler welds are suitable for performing their intended design function. The NRC staff stated that, overall, the licensees presented a credible approach to develop the technical basis for addressing the identified code nonconformance. However, the staff noted that a detailed review of the technical bases supporting the LARs will have to be conducted before determining if they are acceptable.

At the end of each topic discussed, there was an opportunity for the public to provide comments and ask questions. All comments and questions were addressed before moving to the next topic or ending the open portion of the meeting.

In the closed portion of meeting, the staff and the licensees discussed the proprietary details regarding NDE for welds joining couplers to stainless and carbon steel embedment plates.
