Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2
Renewed Facility Operating License Nos. DPR-53 and DPR-69
NRC Docket Nos. 50-317 and 50-318

Subject: Calvert Cliffs GSI-191 Resolution Plan

Reference: 1. Letter from G. H. Gellrich (CCNPP) to Document Control Desk (NRC), dated November 17, 2015, Calvert Cliffs GSI-191 Resolution Plan

In Reference 1, we made five commitments on our risk-informed resolution to Generic Safety Issue 191 (GSI-191) and response to Generic Letter 2004-02. Three of these commitments had a due date of December 31, 2016. This date was based on the assumption that the Nuclear Regulatory Commission's Safety Evaluations on the South Texas Project Risk Informed GSI-191 Pilot submittal and WCAP-17788 would be issued in the 2nd quarter of 2016. The schedule for publication of these Safety Evaluations has now been extended beyond the 2nd quarter of 2016. Therefore, we are revising three of the commitment dates made in Reference 1. This letter contains our revised list of regulatory commitments as listed in Attachment (1).

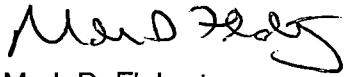

Should you have questions regarding this matter, please contact Mr. Larry D. Smith at (410) 495-5219.

	NRC Regional Administrator, Region I	S. Gray, MD-DNR

ATTACHMENT (1)

LIST OF REGULATORY COMMITMENTS

ATTACHMENT (1)**LIST OF REGULATORY COMMITMENTS**

The table below lists the actions committed to in this letter. Any other statements in this letter are provided for information purposes and are not considered to be regulatory commitments.

Regulatory Commitment	Date
Calvert Cliffs will complete any necessary insulation replacements or remediation, or other identified plant changes no later than the 2018 refueling outage for Calvert Cliffs Unit 1. This completion date is predicated on the successful completion of our Option 2 approach.	5/1/2018 (Unit 1)
Calvert Cliffs will complete any necessary insulation replacements or remediation, or other identified plant changes no later than the 2019 refueling outage for Calvert Cliffs Unit 2. This completion date is predicated on the successful completion of our Option 2 approach.	5/1/2019 (Unit 2)
Calvert Cliffs will establish plant-specific in-vessel debris limits for Calvert Cliffs Units 1 and 2 in accordance with the approved WCAP-16793 methodology. The plant-specific in-vessel debris limits will be submitted with the Calvert Cliffs final submittal for GL 2004-02.	No later than three months after NRC issuance of the Safety Evaluation on the South Texas Project Risk-Informed GSI-191 Pilot Project and the Safety Evaluation on WCAP-17788, whichever is later.
If the Calvert Cliff's Option 2b risk-informed approach is not successful for resolving the GSI-191 issue, then Calvert Cliffs will submit a new resolution plan.	No later than three months after NRC issuance of the Safety Evaluation on the South Texas Project Risk-Informed GSI-191 Pilot Project and the Safety Evaluation on WCAP-17788, whichever is later.
If the Calvert Cliff's Option 2b risk-informed approach is successful for resolving the GSI-191 issue, then Calvert Cliffs will submit a final updated supplemental response to support closure of GL 2004-02 for Calvert Cliffs Units 1 and 2.	No later than three months after NRC issuance of the Safety Evaluation on the South Texas Project Risk-Informed GSI-191 Pilot Project and the Safety Evaluation on WCAP-17788, whichever is later.
