

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION I
2100 RENAISSANCE BLVD.
KING OF PRUSSIA, PA 19406-2713

May 5, 2016

Docket No. 07000371 (Retired)

License No. SNM-368 (Terminated)

Mr. Jeffrey Semancik, Director
Radiation Division
Bureau of Air Management
Connecticut Department of Energy
and Environmental Protection
79 Elm Street
Hartford, CT 06106-5127

Dear Mr. Semancik:

On January 26, 2016, representatives from the Nuclear Regulatory Commission (NRC), U. S. Department of Energy (DOE), UNC Naval, and General Electric (GE) met with you and Michael Firsick of your staff in Hartford, CT, to discuss the Connecticut Department of Energy and Environmental Protection's (CT DEEP) concerns regarding historical surveys and remediation activities conducted at the former United Nuclear Corporation Naval Products (UNC Naval) site at 79 Shelton Avenue in New Haven, CT. These concerns were described in your August 3, 2015, letter (Agency-wide Documents Access and Management System (ADAMS) Accession Number ML15229A076) to the NRC. As discussed during the meeting and during a subsequent tour of the site, GE agreed to develop a radiological survey plan to address the concerns raised in the August 3, 2015, letter and submit the plan to the NRC for review.

GE, in conjunction with their consultant, Cabrera Services, Inc., developed a radiological survey plan (Supplemental Radiological Survey Plan dated March 2016, (ML16092A076)) and submitted the plan to the NRC for review. The NRC completed its review of the Supplemental Radiological Survey Plan and discussed the plan with you and Mr. Firsick on April 28, 2016. With the understanding that CT DEEP will coordinate with the property owner to ensure buildings 3H and 6H will be cleared to the maximum extent possible for accessibility, our organizations agreed that the proposed plan is of sufficient scope to address your previously expressed concerns. As such, I will provide GE with NRC acceptance of the proposed plan. We look forward to continuing to work closely with CT DEEP as the plan is implemented and the results are reviewed.

Please contact me at 610-337-6967 if you have any questions regarding this matter.

Sincerely,

/RA/

Raymond J. Powell, Chief
Decommissioning and Technical
Support Branch
Division of Nuclear Materials Safety
