Subject: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287
Unit 3 Cycle 12 Reload Technical Specifications

Gentlemen:

By letter dated September 25, 1989 I submitted a proposed amendment to the Oconee Nuclear Station (ONS) Facility Operating Licenses and revisions to the ONS Technical Specifications. The proposed revisions are required to support operation of Unit 3 at full rated power during Cycle 12.

Please find attached a supplement to the September 25, 1989 request. This supplement is provided to specifically address references to the VIPRE thermal hydraulic code and deletion of provisions for two reactor coolant pump operation within the No Significant Hazards Consideration Evaluation. (Attachment 2 to the September 29, 1989 Amendment Request).

Very truly yours,

Hal B. Tucker

PJN/61/td
