Mr. William O. Parker, Jr.  
 Vice President - Steam Production  
 Duke Power Company  
 P. O. Box 2178  
 422 South Church Street  
 Charlotte, North Carolina 28242

Dear Mr. Parker:

RE: OCONEE NUCLEAR STATION, UNITS NOS. 1, 2 AND 3

By letter dated September 26, 1977, we informed you of a limited boron dilution incident involving the contents of a spray additive tank at an operating PWR facility. In light of this you were asked to review potential boron dilution incidents at your facility to insure that a similar or other unreviewed method of boron dilution was not more limiting than had been previously analyzed and found acceptable.

Your response of December 20, 1977, indicates that you have reviewed potential boron dilution incidents at your facility and have determined that the FSAR analysis of this event still represents the most limiting case. Based on your response no further action regarding this generic issue is necessary.

Sincerely,

Original signed by

Robert W. Reid, Chief
