John:
More of NU Dirty Tricks to divert attention from the true issues. I believe this to be false information intentionally put out by NU to harass, discredit and otherwise intimidate individuals identifying safety concerns. Maybe the next meeting, according to NU, will be sponsored by a group of pedifiles from Vermont and co-sponsored by the Klan and call themselves "We the Children". NU has put this information out knowing it to be false.

** UPDATE **
Friday, September 29, 1995  
Vol. 6, No. 189  
Please post in a prominent place.

NU share price: 24 3/8, unchanged

NU forecasted load: Today's peak = 4,394 MW (31% of NEPEX load).
NU actual load: Thursday, 9/28 peak = 4,499 MW (preliminary).

1. A meeting called by the Massachusetts-based antinuclear group 'We The People' to address recent allegations of unsafe conditions at Millstone Station was confirmed as a one-sided lecture when NU employees were prevented from speaking in Millstone's defense. The agenda included speeches from the 'We The People' attorney and two former NU employees. Most of those attending the meeting were from outside the area and clearly opposed not only to Millstone but also to nuclear power in general. One NU employee, Kevin McBrien, a senior scientist, was physically urged to sit down and not speak when he attempted to ask the audience to talk to others who work at the plant to get a differing opinion. NU employees stayed after the meeting and spoke to concerned citizens in an informal setting to get their opinions across. "Many of the people were more than willing to listen to our side of the story if they are given the chance," said McBrien. TieLine, 9/29.

2. The Connecticut DPUC is expected to issue a draft decision today on utility executives' pay in a case opened last winter by State Attorney General Richard Blumenthal. He asked the DPUC to ban utilities from including in rate calculations such costs as chauffeured cars, country club dues and big bonuses. He claimed they are unreasonable
