Subject: RE: RE: Document Request for NRC Inspection of Indian Point Unit 2 Baffle Bolts

George,

The inspection is planned for two full days, Wednesday and Thursday. Mel Gray will be observing the inspection as part of inspector oversight. We have also coordinated with the state of New York, since one of their staff members wants to accompany this inspection as well.

The objective of the inspection is to gather additional information regarding the non-destructive examination (specifically UT) of the baffle-former bolts, assess baffle-former bolt replacement activities, and evaluate any current implications for the operability of Unit 3.

We can discuss holding a debrief on Thursday afternoon. More than likely, this inspection will remain open as bolt replacement activities continue and more information is gathered by your staff.

Nik

Hi Nik,

We can have the entrance at 0800 on Wednesday. Starting at 0900 and for the remainder of the day, the baffle bolt team will be meeting with Westinghouse. The documents you requested will be available for your review, and you can observe the baffle bolt operations. The phone call will be 0900 on Thursday.

How long will the inspection last?

Subject: Document Request for NRC Inspection of Indian Point Unit 2 Baffle Bolts

George,

Please provide the following documents in support of the upcoming NRC inspection at Indian Point Unit 2 regarding the current baffle bolt replacement project:

- Indian Point Unit 2 ten-year in-service inspection program plan
- Non-destructive examination procedures of the reactor vessel internals
 - Visual testing (VT-3) of the internals including the baffle bolts
 - Ultrasonic testing (UT) of the baffle-former bolts
- Previous non-destructive examination records of the baffle-former assembly and bolts in 2006 (unit 2) and 2009 (unit 3)
- Qualification of non-destructive examination personnel and procedures for the baffle-former bolt activities
- Baffle-former bolt replacement plan
 - Evaluation for any modifications of the bolt design or material
 - Procedure for removal and installation of bolts
- Condition reports and other corrective action documents related to vessel internals inspections over the last ten years
- Contact List (name and phone number):
 - ISI / ASME Section XI Exams Program Manager
 - Repair and Replacement Program Manager
 - Baffle-Former Bolt Replacement Lead

Also, I would like to conduct an entrance meeting on Wednesday morning sometime between 8:00 and 9:00 AM. I understand that you all will be holding a conference call at 9AM with myself and other NRC staff members to provide an update on the baffle bolt replacements. Please let me know if you have any questions regarding the information requested above.
