Subject: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287
Technical Specification section 4.5
Low Pressure Service Water System

In the Technical Specification Amendment submittal dated May 3, 1993, the limiting conditions for operation and surveillance requirements related to the Low Pressure Service Water system were revised. No changes were made to page 4.5-1 of the Technical Specification during this amendment. Therefore, the page was not included in the Technical Specification submittal. Upon review of the amendment following NRC approval, it was noticed that the words "Reactor Coolant" had shifted from page 4.5-2 to 4.5-1. Please transmit the attached page 4.5-1 which includes the words "Reactor Coolant" to update the Technical Specifications. This is not considered an amendment to the Oconee Technical Specifications.

Very truly yours,

J. W. Hampton
