Revisions to Technical Specification Listings of Core Operating
Limit Methodologies

Attached are proposed revisions to Technical Specifications 6.9.1.9 (for McGuire and Catawba Nuclear Stations) and 6.9.2 (for Oconee) which will reference updated or recently approved methodologies used to calculate cycle-specific limits contained in the Core Operating Limits Report (COLR). All of the new references have been reviewed and approved by the NRC staff; therefore, these changes are considered administrative in nature.

The marked-up Technical Specification pages (as well as revised originals) are contained in Attachment I. The justification and safety analysis, as well as a statement of No Significant Hazards, are contained in Attachment II.

If there are any questions, or more information is needed, please call Scott Gewehr at (704) 382-7581.

Very truly yours,
