Good afternoon:

I have attached a formal request to terminate the NRC license at our San Juan, PR facility. A hard copy is also being sent via USPS.

Thank you.

Mr. Reeve,

My apologies for not getting back to you sooner. You would need to send a letter requesting termination of your license, and that letter would be sent to our Region I office (address below). Once they receive the request, they will go through a process to make sure the all of the steps are followed and will make final determination. My contact in Region I is Sheryl Villar, Sheryl.villar@nrc.gov or 610-337-5239.

Licensing Assistance Team
Division of Nuclear Materials Safety
U.S. Nuclear Regulatory Commission, Region 1
2100 Renaissance Boulevard, Suite 100

Subject: [External_Sender] FW: FW: Irradiator

Importance: High

Good morning Ms. Riner:

I did not get a response from my email sent on April 27, 2016. What documentation do you require to address the charges that we received for the Irradiator License associated with the unit at the Red Cross property in Puerto Rico. We took that device out of service on November 1, 2015 and are currently waiting for the device to be removed. The security assets are in still in place; however, the device has not been used since the aforementioned date.

I look forward to hearing from you.

David Angus Reeve

Subject: [External_Sender] FW: Irradiator

Dear Ms. Price:

I have attached the information that we discussed. Our irradiator has been out of service since November 1, 2015. I am seeking the name and address of the person to whom I can communicate that the irradiator is permanently out of service and scheduled for removal from the premises. Thanks.
