Wolf Creek Nuclear Operating Corporation
NRC Inspection Report 50-482/92-15, Attachment 2,
Docket No. 50-482, September 30, 1992

The purpose of this letter is to advise the NRC Staff of Duke Power Company's participation in a generic industry effort to address NRC Staff concerns relative to the subject report.

Duke Power Company, in cooperation with 27 other utilities (see Attachment 1) are working together to formulate a single response to questions that have been identified thus far in the above referenced documents. This response will be initially submitted on the Wolf Creek docket and it is our intent to similarly docket the response for our own nuclear units. Should there be a need for any follow-up questions, a similar process for providing responses would occur.

It is hoped that this process will provide an effective and cost-efficient means of achieving a resolution to this generic issue.
