Operating Reactors Branch No. 4

Re: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287

Dear Sir:

Transmitted herewith for your records are forty (40) copies of the Duke Power Company technical report retitled NFS - 1001A, "Oconee Nuclear Station Reload Design Methodology". The NRC staff reviewed the revised report and found it to be an acceptable method of performing reload design calculations for Oconee Nuclear Station Units 1, 2, and 3 reloads as documented in their July 29, 1981 Safety Evaluation. Technical Report NFS - 1001A, was originally submitted as NFS - 1001 by letter dated April 23, 1979 and revised by letters dated May 20, 1980, January 28, April 22, and June 16, 1981.

Very truly yours,

Hal B. Tucker

JCP/rhs
