Attention: J. F. Stolz, Chief  
Operating Reactors Branch No. 4

Subject: Oconee Nuclear Station  
Docket Nos. 50-269, 50-270, & 50-287

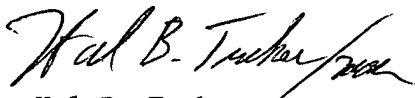

Dear Sir:

By letter dated June 10, 1985, the NRC staff requested additional information for evaluation of Duke Power Company's (Duke) response to Generic Letter 83-28, Item 2.1 (1), 2.1 (2), 2.2.2, 4.4, 4.5.2 and 4.5.3. My letter of August 9, 1985 transmitted a response to the requested information. Within our response to Item 2.1, Part 1, Duke committed to provide schedular information by August 30, 1985 related to Item 2.1, Part 1. The following paragraphs are intended to fulfill that commitment and provide a supplement to Duke's response dated August 9, 1985.

Duke verifies that B & W Owners Group listing of Reactor Trip System (RTS) components referred to in our response to Generic Letter 83-28, Item 2.1, Part 1, dated November 4, 1983 includes all RTS components for Oconee Nuclear Station, Unit 1, 2 and 3. All safety related RTS components in the referenced listing have been identified as safety-related on Oconee Nuclear Station procedures to control and execute safety related activities. However, some NSSS vendor information and/or revisions related to the calibration and maintenance of the RTS components may not have been reviewed for impact to Oconee Nuclear Station procedures.

The process to identify all RTS components in the referenced listing as safety-related on documents, drawings and information handling systems is continuing. This effort would assure that the safety related RTS components are correctly and consistently identified and any NSSS vendor changes or revisions to calibration and/or maintenance of these components which may impact the Oconee Nuclear Station procedures, are also identified and incorporated in documents, drawings, procedures and information handling systems for Oconee Nuclear Station. Duke plans to complete this work effort by July 31, 1986.

Very truly yours,

Hal B. Tucker
