Subject: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287
Generic Letter 89-04

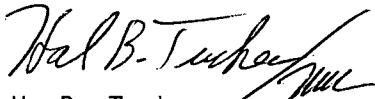

Gentlemen:

By letter dated April 3, 1989, the NRC issued Generic Letter (GL) 89-04, Guidance on Developing Acceptable Inservice Testing Programs. For Oconee Nuclear Station GL 89-04 approves currently submitted IST program relief requests provided that: 1) the most recently submitted IST program and implementation procedures be reviewed against the positions delineated in the GL; and 2) within 6 months of the date of the GL, confirm in writing conformance with the stated positions.

Prior to issuance of GL 89-04, Duke Power Company had initiated a reevaluation of the entire IST program at Oconee. This reevaluation is currently in progress and will result in significant changes to the most recently submitted IST program as well as the implementation procedures. Additions to the program are scheduled to be implemented during upcoming refueling outages (Unit 1 March 1990, Unit 2 August 1990, Unit 3 November 1989). The reevaluation process is expected to be completed by November 1, 1990. At that time I will forward the updated IST Program and address GL 89-04.

If there are any questions do not hesitate to contact through normal licensing channels.

Very truly yours,

H. B. Tucker
