Subject: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287  
Safety Parameter Display System (SPDS)  
Response to Generic Letter 89-06

Gentlemen:

My letter of August 18, 1989 provided our response to the subject Generic Letter 89-06. Attachment 4 to my letter included a summary of the action items required for the Oconee SPDS to fully meet the requirements of NUREG-0737, Supplement 1, and recommendations of NUREG-1342. Item 8 of Attachment 4 stated that preliminary indications from our review of the Oconee SPDS are that all computer input points for the SPDS may not now be covered by the surveillance activities. It further stated that the ongoing review would be completed by October 16, 1989 and at that time we would notify the NRC of the results of our findings and schedules for implementation of corrective actions to assure that all SPDS computer points are included in surveillance activities.

We have completed our review of the SPDS computer input points and have identified a number of the SPDS computer input points which are not currently included in routine instrument loop surveillances. We intend to develop appropriate procedures and include all SPDS computer input points in our routine surveillance activities. This task is currently scheduled for completion by February 1, 1990.

Very truly yours,

*Hal B. Tucker*
