Subject: Oconee Nuclear Station
Docket Nos. 50-269, 50-270, 50-287

Dear Sir:

The purpose of this letter is to provide the status of the installation of the Emergency Notification System (ENS) phone at the Crisis Management Center (emergency operations facility) for the Oconee Nuclear Station.

A new Crisis Management Center (CMC) for the Oconee Nuclear Station was implemented on July 1, 1989. The NRC was notified in a letter dated July 6, 1989 (attached) that the ENS installation was not completed. Earlier this year, a technician from AT&T attempted to install the ENS. After experiencing problems with the operation of the system, the technician called Mr. Ron Harris of Duke Power who arranged a conference call with NRC and AT&T representatives. The problem was not resolved that day, but possible corrective actions were discussed. The system is currently not operational. A station telephone package made by Tellabs has been installed in the telephone equipment room and is wired to the Plant Assessment room. (See attached layout drawings.) A cable connection is in the floor in the Plant Assessment room, but a phone is not installed. A beige, rotary dial telephone is in the telephone equipment room. The wiring is tagged showing circuit ID 30/LCGS/400383 and Southern Bell circuit ID PLLJ 102519.

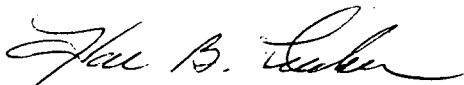

It is our understanding that the NRC normally requires an ENS extension in the NRC room of the facility in addition to an extension in the licensee's work area. The AT&T technician stated that his work order only required one phone. The NRC may want to consider whether this is adequate.

Please contact Ms. Diane Simpson at (704) 373-8771 to coordinate the work remaining to install the ENS at the Oconee CMC.

Very truly yours,

Hal B. Tucker
