UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

LICENSEE: Entergy Nuclear Operations, Inc.

FACILITY: Indian Point Nuclear Generating Unit Nos. 2 and 3

SUBJECT: SUMMARY OF TELEPHONE CONFERENCE CALL HELD ON MAY 10, 2016, BETWEEN THE U.S. NUCLEAR REGULATORY COMMISSION AND ENTERGY NUCLEAR OPERATIONS, INC. CONCERNING THE INDIAN POINT NUCLEAR GENERATING UNIT NOS. 2 AND 3 LICENSE RENEWAL APPLICATION (CAC NOS. MD5407 AND MD5408)

The U.S. Nuclear Regulatory Commission (NRC) staff and representatives of Entergy Nuclear Operations, Inc. (Entergy), held a telephone conference call on May 10, 2016, to discuss the NRC staff's review of the Indian Point Nuclear Generating Unit Nos. 2 and 3 license renewal application. Specifically, the NRC staff expressed concern with apparent discrepancies identified during the review of Entergy responses to requests for additional information related to LR-ISG-2012-02, "Aging Management of Internal Surfaces, Fire Water Systems, Atmospheric Storage Tanks, and Corrosion Under Insulation." In response, Entergy stated that they would give broader consideration of the operating experience that could constitute recurring internal corrosion, including enhancing review procedures to ensure that responses to NRC staff requests for additional information have fully considered all potentially applicable operating experience. In addition, Entergy stated that the issue of how operating experience is considered as a part of recurring internal corrosion has been entered into the corrective action program for tracking. The NRC staff and Entergy agreed to have a follow-up phone call in approximately 3 months to assess the effectiveness of Entergy's changes.

The enclosure provides a listing of the participants of the phone call.

Entergy had an opportunity to comment on this summary.

Sincerely,

Michael Wentzel, Project Manager  
Environmental Review and Projects Branch  
Division of License Renewal  
Office of Nuclear Reactor Regulation

Docket Nos. 50-247 and 50-286
