Telephone Conversation Record

Date: 5/19/2016

License No. 47-23091-02

Docket No.(no hyphens): 03037140

Mail Control/Report No. 590861

Licensee Name: Spartan Mining Company

Participant(s) Name/Title: William Newsome

Work Telephone No. 304-369-8623

Business Cellphone No. Unknown

NRC Representative Name/Title: Dennis Lawyer/ Health Physicist

Subject: RAI, Material Amount, Location, & SS&D model numbers

Discussion: I called Mr. Newsome to ask questions about his application.

He stated that the locations of use are the same that is on the license just they used the 911 designated location on the license. They added the location of the device that was on the belt line which is a few miles from the plant because it was so far from the plant. I looked on Googlemaps.com and saw that the location was 100 Mammoth Processing Mine, London, WV, which inspectors may use in the future but Mr. Newsome assured me that the address given was the proper address for 911 calls.

I asked the maximum amount that he wanted to be licensed so he could change out devices in the future. He said 1700 millicuries. I told him the model numbers that he placed on the application was not the model numbers as stated in sealed source and device registry. He told me that all of his devices are LB 7440 devices.

I told him that I needed transfer information and leak tests to remove the Am-241 and Cf-252 from the license. He said that he would send it in.

Mr. Newsome also discussed that the current devices were previously generally licensed devices and they were working with the manufacturers to change it back to being generally licensed. I told Mr. Newsome that the only way I knew to change it back was to transfer the device to the manufacturer and have the re-distribute it back to them as generally licensed. After they get generally licensed devices, they will terminate the specific license.

Action Required: Mr. Newsome to send in transfer and leak test information on the specifically licensed devices that were transferred.
