SUBJECT: NOTICE OF VIOLATION  
(NRC INSPECTION REPORT NOS. 50-269/95-06, 50-270/95-06 AND  
50-287/95-06)

Gentlemen:

This refers to the inspection conducted by P. E. Harmon of this office on March 26 - April 29, 1995. The inspection included a review of activities authorized for your Oconee facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Based on the results of this inspection, certain activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). The violation is of concern because it indicates that Keowee has not been fully integrated into Oconee nuclear operations.

The violation described in the enclosed Notice is similar to a violation contained in the Notice sent to you by our letter dated July 20, 1993. Recurring violations are of particular concern because the NRC expects licensees to learn from their past failures and to take effective corrective actions. Although NRC does not normally consider monetary civil penalties for Severity Level IV violations, the Enforcement Policy states that such penalties may be imposed for Severity Level IV violations that are similar to previous violations for which the licensee did not take effective corrective action. In this case, we have decided not to hold an enforcement conference nor to propose a civil penalty because the maximum Keowee load limit was not exceeded.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions and any additional actions you plan to prevent recurrence. After reviewing your response to this Notice, including your proposed corrective actions and the results of future inspections, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with the NRC regulatory requirements.
