Re: License Amendment NRC Material License 21-32793-01

To Whom It May Concern:

OHMs request an amendment to Radioactive Material License No.21-32793-01 for the possessing nuclear moisture density gauges by increasing our license possession limit to 7 gauges for the following unit: InstroTek model 3500 Xplorer nuclear moisture density gauge for measurement of soils. These models are registered under the sealed source & device certificate NO. NC-1241-D-101-S. OHM's NRC license Byproduct section 6D and 6E levels would increase to the following mCi levels:

1. Cs-137 (AEA Technology/QSA, Inc. Model No. CDC.85 or Isotope Product Laboratories Model No. HEG-137)
Maximum activity: 77 mCi
2. Am-241:Be (AEA Technology/QSA, Inc. Model No. AMNV.997 or Isotope Product laboratories Model No. Am1.NO2)
Maximum activity: 308 mCi

If you have any questions, please feel free to call.

Sincerely,

Douglas Cooper
