SUBJECT: CANBERRA INDUSTRIES, INC., CONSENT TO TRANSFER LICENSE,  
CONTROL NO. 590643

Dear Mr. Tamburro:

By the letter dated April 7, 2016, Canberra Industries, Inc. requested written consent by the U.S. Nuclear Regulatory Commission (NRC) to a proposed indirect transfer of control of the above license to Mirion Technologies, Inc. From your letter, we understand that this transfer will not result in any change to the licensed name, location of use, materials, persons using licensed material, or persons responsible for radiation safety at the licensed facility.

Based on the above understandings, as more fully detailed in the enclosed NRC staff's Safety Evaluation Report, which documents the NRC staff's safety review of the request, the NRC consents to the proposed transfer. Please note that you will need to notify us promptly, in writing, after the transaction has been finalized and include a signed copy of the sale agreement confirming completion of the transactions. With this information, we can issue an administrative amendment to your NRC license to reflect the transaction, if necessary. Please notify the NRC in writing, if this planned sale has not been consummated within 30 days of June 30, 2016, or this consent may be deemed null and void. Please contact Dennis Lawyer at 610-337-5366, or by e-mail [dennis.lawyer@nrc.gov](mailto:dennis.lawyer@nrc.gov) if you have any questions regarding this letter.

Based on the above understandings, the NRC consents to the proposed indirect transfer of control of NRC Materials License No. 06-15099-01. Future changes in the licensee's named, licensed use, licensed materials, licensed location, or persons responsible for licensed material require submission of a request to amend the license. NRC approval must be received prior to implementation of the proposed change.

In accordance with 10 CFR 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's Agencywide
