1.0 INTRODUCTION

This summary describes the design documents associated with the Mitsubishi Electric Corporation (MELCO) Energy Systems Center (ESC) Mitsubishi Electric Total Advanced Controller (MELTAC) Platform. The MELCO ESC design documents encompass the MELTAC Platform hardware and the basic software, which includes the firmware and Field Programmable Gate Arrays (FPGAs) on all MELTAC Platform modules.

This document supports the “Safety System Digital Platform - MELTAC - Topical Report” (JEXU-1041-1008) and satisfies the commitments made under Table 1 sections 1.12, 1.13, 2.3, 2.9, 3.1, 3.3, 3.7, 3.8, 3.9 and 3.10 of “Mapping of MELTAC Platform Licensing Documents to the DI&C-ISG-06 Guidance” (JEXU-1041-1012).

2.0 DOCUMENTATION TREE AND CATEGORIZATION

Figure 1 shows the MELTAC Platform Documentation Tree. These documents are internal documents, which are categorized into three groups according to the following phases: Design Phase, Qualification Phase, and V&V Phase. The scope of this summary is the design documents prepared in the Design Phase.

The Qualification Phase documents are described in “Summary of MELTAC Platform Equipment Qualification” (JEXU-1041-1023), and the V&V Phase documents are described in “Summary of MELTAC Platform V&V” (JEXU-1041-1026).

The MELTAC Platform Design documents corresponding to the information required by DI&C-ISG-06 “Licensing Process” (ISG-06) Enclosure B (Tier 3) are listed in Section 3. Specific document numbers are identified in Appendix A.

The types and summaries of the design documents related to the MELTAC Platform are listed in Section 4.

3.0 MELTAC DOCUMENTS CORRESPONDING TO THE DOCUMENTS IN ISG-06 ENCLOSURE B TIER 3

The MELTAC Platform documents corresponding to the information required by ISG-06 Enclosure B (Tier 3) are listed in Table 1. Specific document numbers are identified in Appendix A.

Table 1 MELTAC Platform Documents Corresponding to Documents in ISG-06 Enclosure B (Tier 3)

ISG-06 Enclosure B Tier 3 Document		Applicable ISG-06 Section	MELTAC Documents
1.12	Software Requirements Specification (SRS)	D.4.4.3.1	System Specification (Platform Specification)

4.0 CONTENTS OF MELTAC PLATFORM DESIGN DOCUMENTS

The following describes the contents of each design document shown in Figure 1.

4.1 System Specification (Platform Specification)

This document describes the specifications for the entire MELTAC Platform, including software, FPGAs and hardware. The document's contents are described below.

[

1

4.2 Hardware Requirement Specification

This document describes the requirements related to hardware extracted from the System Specification. The document's contents are described below.

[

]

4.3 Hardware Specification

This document provides detailed module specifications to implement the requirements described in the Hardware Requirement Specification. The document's contents are described below.

[

]

4.4 FPGA Specification

This document describes the specifications implemented in FPGA extracted from the Hardware Specification. The document's contents are described below.

[

]

4.5 Software Specification

This document describes the specifications related to software from those described in the System Specification. The document's contents are described below.

[

]

4.6 Program Specification

This document describes detailed specifications for function described in the Software Specification. The document's contents are described below.

[

]

4.7 FPGA Code

The FPGA source code coded is based on the contents of the FPGA Specification.

4.8 Source Code

The software source code coded is based on the contents of the Program Specification.

4.9 Production Drawings

The Production Drawings provide the necessary information to manufacture the MELTAC Platform modules. There are various types of Production Drawings as described below.

4.9.1 Standard Item Description

A Standard Item Description is a table that includes information (i.e. drawings, documents, parts lists etc.) used to provide instructions to manufacturing.

[

]

Figure 2 Content of Standard Item Description (Sample)

4.9.2 Hardware Drawings

4.9.2.1 Schematic Diagram

This diagram shows the interconnection of parts based on the Hardware Specification requirements.

4.9.2.2 Parts List

This list identifies the parts used for implementing the requirements described in the Hardware Specification. Each part is provided with a location number, which is linked to the location number in the Pattern Layout described below.

4.9.2.3 Pattern Layout

This drawing shows the parts layout and connections for implementing the circuitry specified on the Schematic Diagram.

4.9.2.4 Assembly Drawing

This drawing provides the required information needed to assemble components as described in the Hardware Specification.

4.9.3 Software (including FPGA) Drawing

4.9.3.1 Writing Instruction (Basic Software Installation Drawing)

The Writing Instruction contains the following information.

- Software identification information (product number)
- Software Version
- Checksum or CRC value
- Loading instructions

This information is used by the Manufacturing Department to verify that the Software installation was completed correctly.

5.0 CONTENTS OF OTHER RELATED DOCUMENTS

5.1 Risk Matrix

[

]

5.2 Configuration Management Sheet

[

]

5.3 Integration Test Report

The Integration Test Report documents test results and evaluations, and contains the following items.

- Test Report name, number, and revision level
- Project name, number and applicable phase
- Applicable procedure
- Computer program, module or unit name and version tested
- Computer hardware used
- Test equipment serial number and calibrations
- Software tools used, including version number
- Persons performing the test or recording the test data
- Test results and acceptability (against acceptance criteria)
- Test log (chronological record of test-relevant details)
- Person evaluating test results
- Test data used and/or produced
- List of identified V&V Anomalies

APPENDIX A

MELTAC Platform Design documents are listed.

(1) Basic Design Document

- (3) Software Design Document
 - a. Software Specification

b. Program Specification
