

**Suspicious Activity Reporting Using the Protected Web Server (PWS)
OMB Approval Number 3150-0219**

Copy of the Information Collection

The screenshot displays a web application interface for creating a Suspicious Incident Document (SID). At the top, there is a navigation bar with a tab labeled "SID (New)". Below the tab are buttons for "Refresh", "New Document", "More", and "Cancel". A progress bar below the navigation bar shows the current status as "Draft", with other stages being "ILTAB", "Released NRC Only", "Released All", and "Unreleased".

The main content area is titled "SID (New)" and indicates it was "Created by Krista Ziebell on Jun 6, 2016 2:52:51 PM". There are three tabs: "General Information" (selected), "Access Control", and "All Tabs".

Below the tabs, there is a "Last Comment" section with a "Comments (Add | View History)" link. The "Record Number" field is labeled "Please Save". The "EN #" field contains the value "N/A". The "Incident Status" section has three radio button options: "Open" (selected), "Closed Resolved", and "Closed Unresolved".

Under the "General Information" section, there are two required fields marked with a red asterisk: "Incident / Communication Document Date" and "Subject/Short Description".
