Subject: Notification of Readiness for Supplemental Inspection
River Bend Station – Unit 1
Docket No. 050-458
License No. NPF-47

RBF1-16-0066

Dear Sir or Madam:

This letter serves as notification of River Bend's readiness for your office to perform a supplemental inspection. This would be a follow-up inspection of the extent of condition for a white violation (10 CFR 55.46(c)(1)) associated with simulator fidelity (failure to maintain the simulator so it would demonstrate expected plant response to operator input and to normal, transient, and accident conditions to which the simulator has been designed to respond) as documented in NRC Inspection Report 05000458/2015009.

We propose the week of June 6, 2016 as a suitable time to accommodate the requirements of this inspection. In the event that NRC cannot support an inspection on this date, we can accommodate this activity during the week of June 20, 2016.

This letter contains no regulatory commitments. If you have any questions on this matter, please contact Marvin Chase at 225-381-3612.

Sincerely,

WFM / MLC / dhw
