DUKE POWER

December 16, 1993

U.S. Nuclear Regulatory Commission
Attention Document Control Desk
Washington, DC 20555

Subject: Duke Power Company
Oconee Nuclear Station
Docket No. 50-269, 270, 287
Organizational Change
Technical Specification 6.1.1.4

This letter is to inform the NRC of an organization change at Oconee. Effective January 1, 1994, B. L. (Jack) Peele will become the Oconee Station Manager. For your information I have attached a copy of Jack's resume which shows his experience and training.

Jack is currently enrolled, but has not completed, Duke Power's Technical Nuclear Certification program. Oconee Technical Specification 6.1.1.4 specifies personnel meeting the minimum requirements encompassing the training and experience described in section 4 of ANSI/ANS-3.1-1978 be incorporated into the staff of the station. ANSI/ANS-3.1, Section 4.2.1, Plant Managers, specifies, among other requirements, the Plant Manager shall have acquired the experience and equivalent training normally required to be eligible for a Senior Reactor Operator's license. This section also stipulates in an organization which includes one or more persons who are designated as principal alternates for the Plant Manager and who meet the experience and training requirements for Plant Manager, the Plant Manager need not be eligible for the NRC examination.

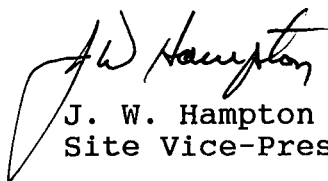

Until Jack has completed his training, which, in conjunction with his previous experience and education, will fully satisfy Technical Specification 6.1.1.4, the specification is satisfied by the allowance in ANSI/ANS- 3.1 of principal alternates meeting the training and experience of the Plant Manager. These alternates will be the Superintendent of Operations and the Superintendent of Work Control, both of whom have held Senior Reactor Operator's licenses.
