February 28, 1994

U.S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, DC 20555

Subject: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287  
Generic Letter 89-19

In the SER dated November 3, 1993 for the response to Generic Letter 89-19, the NRC staff concluded that the modified designs for the steam generator overfill and dryout protection are acceptable and satisfy the objectives of Generic Letter 89-19. In addition, the SER states that the Selected Licensee Commitment is acceptable and satisfies the objectives of the Generic Letter 89-19 recommendation regarding Technical Specifications.

In accordance with our responses to Generic Letter 89-19, the steam generator overfill and dryout protection designs have been modified. Also, Selected Licensee Commitments were included in FSAR Chapter 16 for steam generator overfill protection and EFW actuation on low steam generator level.

Very truly yours,

  
J. W. Hampton
