Gentlemen:

SUBJECT: NOTICE OF VIOLATION AND SUMMARY OF ENFORCEMENT CONFERENCE
(NRC INSPECTION REPORT NOS. 50-413/87-43, 50-414/87-43,
50-369/87-45, 50-370/87-45, 50-269/87-50, 50-270/87-50, AND
50-287/87-50)

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by Mr. William Tobin on December 8-9, 1987. The inspection included a review of activities authorized for your Catawba, McGuire, and Oconee facilities. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the inspection report sent to you on January 11, 1988. NRC concerns relative to the inspection findings were also discussed in an Enforcement Conference held on January 15, 1988. A summary of this Enforcement Conference is enclosed. The Enforcement Conference was beneficial in that it allowed you to better explain the numerous examples of failing to protect Safeguards Information when in electronic transmission and while in storage which you reported to us on December 3, 1987.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appeared to violate NRC requirements. The violations, references to pertinent requirements, and elements to be included in your response are described in the enclosed Notice of Violation.

The violations described in the enclosed Notice of Violation are of significant concern to us for several reasons; the extended period of time during which the violations occurred and repeated opportunities for your staff to have identified them, the voluminous amount of Safeguards Information involved, and the similarity of these violations to a previous violation involving failures to properly destroy Safeguards Information which was furnished to you in our letter of June 15, 1987. While these violations demonstrate a lack of management oversight at your Corporate Nuclear Security level, they also question the adequacies of your quality assurance audits and employee training relative to the requirements of 10 CFR Part 73.21.
