August 24, 1982

Dockets Nos. 50-269/270/287

LICENSEE: Duke Power Company
FACILITY: Oconee Nuclear Station, Units 1, 2 and 3
SUBJECT: SUMMARY OF AUGUST 18 and 19, 1982 MEETING WITH DUKE
POWER COMPANY

A meeting was held at the Oconee Nuclear Station (ONS) on August 18 and 19, 1982 with representatives of Duke, NRC and our consultants Franklin Research Center (FRC) to discuss the Radiological Effluent Technical Specifications (RETS). A list of attendees is contained in Enclosure 1.

An application to revise the Oconee RETS in accordance with NRC guidance contained in Revision 2 of the Model RETS (NUREG-0472) was submitted by Duke on October 30, 1980. FRC compared this submittal to staff guidance and provided the results in draft reports for the RETS and the Offsite Dose Calculation Manual (ODCM). These draft reports, dated July 30, 1982, provide the basis and agenda for our meeting.

Resolution was reached on all issues where deviations from staff position had been identified except for the following:

1. The issue of explosive gas limitations and monitoring was deferred and will be handled as a separate issue following completion of the ongoing Duke and NRC studies of system requirements.
2. The respective dose commitment limitations proposed by Duke for the common ONS TSs are three times the design objectives contained in Appendix I. Duke explained that there exists no positive means to separate the releases on a per unit basis because of the shared treatment equipment and release points. We agreed to consider the Duke position and inform them of our decision and/or proposed alternative.
3. Further discussions on the needed content of Process Control Program (PCP) will be necessary following re-evaluation of NRC and Duke positions.
4. Duke will re-evaluate the necessity of Sr-90 analysis requested by us based on an incident of elevated concentrations in a fish in 1979; the results and/or additional information will then be provided.

P PDR

At the conclusion of the meeting, we requested a revised RETS application which would incorporate all of the agreements reached during the meeting. Duke agreed to submit a revised application by November 15, 1982.
