Ms. Cindy Scott, RN, OCN  
Manager, Radiation Oncology  
Mount Clemens Regional Medical Center  
1000 Harrington Blvd.  
Mount Clemens, MI 48043

SUBJECT: NRC ROUTINE INSPECTION REPORT NO. 03002040/2016001(DNMS)  
MOUNT CLEMENS REGIONAL MEDICAL CENTER

Dear Ms. Scott:

On January 20 and 21, 2016, inspectors from the U.S. Nuclear Regulatory Commission (NRC) conducted a routine inspection at your facility in Mount Clemens, Michigan, with continued in-office review through May 9, 2016. The purpose of the inspection was to review activities performed under your NRC license to ensure that activities were being performed in accordance with NRC requirements. In addition, the inspection included a review of the stuck source event at your facility that Elekta, Inc., reported to the NRC on August 19, 2015. The in-office review included a review of documentation of the manufacturer's review of the stuck source event. Mr. Geoffrey Warren of my staff conducted a final exit meeting by telephone with you on May 12, 2016, to discuss the inspection findings.

During this inspection, the NRC staff examined activities conducted under your license related to public health and safety. Additionally, the staff examined your compliance with the Commission's rules and regulations as well as the conditions of your license. Within these areas, the inspection consisted of selected examination of procedures and representative records, observations of activities, and interviews with personnel. No violations were identified during this inspection. No response is required to this letter.

In accordance with Title 10 of the *Code of Federal Regulations* (CFR) Section 2.390 of the NRC's "Rules of Practice," a copy of this letter will be made available electronically for public inspection in the NRC's Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC's website at <http://www.nrc.gov/reading-rm/adams.html>.

C. Scott
