Mr. Frank Tran  
US Nuclear Regulatory Commission  
License Reviewer  
NRC Region 3/Division of Nuclear Materials Safety

Re: Mail Control Number 590621  
NRC License No. 21-32841-01

Dear Mr. Tran:

Thank you for your email inquiry. In response, we request that Van Andel Research Institute's (VARI) NRC license be amended to remove Anthony Chang as an Authorized User and change the status of the Ge/Ga-68 source to "for storage only incident to disposal". It will be subject to the provisions listed on our license for sealed sources until it is disposed. We will send a separate Amendment Request to remove the sealed sources from our license when they have been removed from the facility and will provide all necessary documentation.

Please let me know if you have any questions.

Sincerely,

A handwritten signature in cursive script, appearing to read "David W. Lutkenhoff".

David W. Lutkenhoff, M.S., CIH  
Environmental Health and Safety Manager  
Radiation Safety Officer
