**Subject:** [External\_Sender] NRC Indian Point Annual Assessment Meeting on June 8, 2016

Gentlemen:

I plan to speak and ask a few questions during the NRC's Annual Assessment meeting. In the past, I usually received responses such as "We will get back to you." In order to avoid this I would appreciate the NRC be prepared to provide responses to the following questions which can be answered with a simple "Yes" or "No" answer. Please be prepared to respond to these questions during the annual assessment meeting with definitive answers.

1. Has the buried portion of the gas lines been analyzed by the licensee for potential impact on Indian Point? Please provide reference ML#.
2. Have the "fuel oil storage tanks" been verified to be free of flammable content?
3. Have the plant operators and the fire brigade been properly trained to combat a gas leak or explosion of the gas lines that are located within 400 feet of the Unit #3 control and switchgear rooms? Please note this is a requirement of both 10 CFR 50 and 49 CFR 192.

Additionally, I would appreciate a brief discussion of the recent identification of additional failed baffle bolts including possible need for supplemental LER and root cause analysis and assurance that there are no additional failed baffle bolts.

I believe that the Senior Resident Inspector, the person closest to these issues, would be the best qualified person to respond to these simple and direct questions.
