Jill,

Please find attached our comments on the Preliminary Draft Supplement EIS for the Reno Creek Uranium In Situ Recovery project in Wyoming. Please note that due to travel and competing priorities, our review should not be considered a complete review and we may identify additional comments during the public comment period for the DSEIS. We focused our review on air, groundwater and underground injection control (UIC).

Let me know if you have any questions or want to discuss any of our comments. Thank you for the opportunity to provide comments on this preliminary draft document.
