

IDENTIFICATION OF SIGNIFICANT LICENSING ACTIONS

License No: 23-01544-16 Docket No: 030-19290
Licensee: U.S. Army Corp of Engineers, Vicksburg District Mail Control No: 590529
Note to: Kellar Chief, NMSBA or designee // J. Katarz
From: Campbell Chief, NMSBB or designee // M. Hammel

Re: POSSIBLE NEED FOR ONSITE INSPECTION BEFORE ROUTINE INSPECTION

An onsite inspection of the licensee identified above should be considered due to a recent significant licensing action involving one or more of the criteria described below. Additional information is enclosed.

LICENSE REVIEWER - CIRCLE ALL ITEMS THAT APPLY

- 1. Increased types and quantities (below Part 37 material)
- 2. Physical move or temporary job site
- 3. Add or remove use or storage location, especially Part 37 use or storage
- 4. Increased disposal authorization
- 5. Significant increase in number of authorized users
- 6. Change of WBL primary code and/or secondary code
- 7. Existing licensee requesting to add Part 37 material for the first time, or existing Part 37 licensee requesting to no longer have Part 37 material
- 8. License has been terminated; or license was administratively terminated and a new license issued because of a change of corporate address from one state to another state.
- 9. Issuance of a new license

License reviewer: [Signature] Date: 6/21/16

FOR USE BY CHIEF NMSBA OR DESIGNEE

Change date of next inspection? No () Yes
New inspection date: _____

Comments: Thanks for the update

Chief NMSBA or designee: [Signature] Date: 6/30/16

FILE IN DOCKET FILE UPON COMPLETION OF THE ABOVE

Checklist for determining when significant licensing action has taken place that may require an additional onsite inspection

If recent licensing actions have resulted in one of the following, regional management should determine the need for performing an onsite inspection prior to the next routine inspection.

1. Does the licensing action result in increased authorization for types and quantities of radioactive material that could result in a significant potential for increased radiation exposure to the public and occupational workers?
() Yes or No _____

Note: This can be identified by a change to a higher priority, i.e., from a Priority 2 to a Priority 1 license. Another "rule of thumb" for identifying a significant change in this area would be an increase in the authorized quantity from a millicurie amount to a curie amount.

2. Does the licensing action authorize a physical move of a facility or authorize use at a temporary job site(s)?
() Yes or No _____

3. Does the licensing action authorize or removes a location where (make a selection non-Part 37 or Part 37) material will be used or stored?
(X) Yes or No _____

Tallulah Project Office
307 Oak Drive, Tallulah, LA.

4. Does the licensing action increase the types of uses or disposal (incineration) of radioactive materials?
() Yes or No _____

5. Does the licensing action significantly increase the number of authorized users?
() Yes or No _____

6. Does the licensing action change the Web Based Licensing System primary and/or code?
() Yes or No _____

7. Does the licensing action add Part 37 material for the first time or remove Part 37 material from an existing license?
() Yes or No _____

8. Has the license been terminated (final action)? Has the license been terminated and a new license issued because corporate address changed from one state to another?
() Yes or No _____

9. Issuance of a new license (state name, docket number, license number, mail control number)
