General Comment

Regulatory issue summaries are used to

- (1) communicate and clarify NRC technical or policy positions on regulatory matters that have not been communicated to or are not broadly understood by the nuclear industry,
- (2) inform the nuclear industry of opportunities for regulatory relief,
- (3) communicate previous NRC endorsement of industry guidance on technical or regulatory matters,
- (4) provide guidance to applicants and licensees on the scope and detail of information that should be provided in licensing applications to facilitate NRC review, and
- (5) request the voluntary participation of the nuclear industry in NRC-sponsored pilot programs or the voluntary submittal of information which will assist the NRC in the performance of its functions.

It doesn't seem appropriate to use forceful language such as "(NRC) is issuing this regulatory issue summary (RIS) to reiterate existing requirements" or "this RIS reinforces the obligations of nuclear power plant licensees" when neither reiteration nor reinforcement are contained in the RIS purpose statement from NRC.gov
