Subj: Washington Public Power Supply  
System (WPPSS Nuclear Project  
No. 1) Docket No. 50-460-OL

Gentlemen:

In accordance with the October 14, 1983, Memorandum and Order in the captioned proceeding, the Washington Public Power Supply System hereby submits its quarterly status report regarding construction activities at WNP-1.

During the fourth quarter of 1992, no significant safety-related construction activities were performed at WNP-1, although a limited engineering effort was continuing. We do not anticipate any change in this level of activity during the next several months.

Sincerely,

  
Nicholas S. Reynolds  
Counsel for Applicant

No. 1) Docket No. 50-460-OL

Gentlemen:

In accordance with the October 14, 1983, Memorandum and Order in the captioned proceeding, the Washington Public Power Supply System ("Supply System") hereby submits its quarterly status report regarding construction activities at WNP-1.

During the second quarter of 1992, no significant safety-related construction activities were performed at WNP-1, although a limited engineering effort was continuing. We do not anticipate any change in this level of activity during the next several months.

Further, mindful of our obligation to keep the Licensing Board apprised of new information relevant to matters being adjudicated,<sup>1/</sup> we advise the Board and parties that in April 1993 the executive board of the Supply System voted to initiate a study of possible termination of WNP-1 and WNP-3. Completion of the study and formal action on any recommendations are not

<sup>1/</sup> See Duke Power Co. (William B. McGuire Nuclear Station, Units 1 and 2), ALAB-143, 6 AEC 623, 625 (1973).

Subj: Washington Public Power Supply  
System (WPPSS Nuclear Project  
No. 1) Docket No. 50-460-OL

Gentlemen:

In accordance with the October 14, 1983, Memorandum and Order in the captioned proceeding, the Washington Public Power Supply System ("Supply System") hereby submits its quarterly status report regarding construction activities at WNP-1.

During the third quarter of 1993, no significant safety-related construction activities were performed at WNP-1, although a limited engineering effort was continuing. We do not anticipate any change in this level of activity during the next several months.

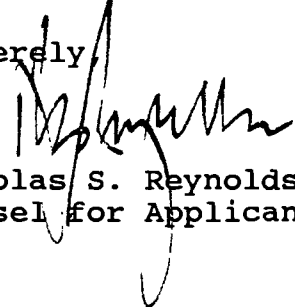

Further, pursuant to our obligation to keep the Licensing Board apprised of developments potentially relevant to this proceeding, we advise the Board and parties that a consortium of companies has proposed acquiring WNP-1 (and WNP-3, as well). Under the unsolicited proposal submitted to the Department of Energy ("DOE"), the consortium would complete construction of the units, deed them to DOE, and then contract to operate them as DOE-owned weapons-grade facilities, with the excess steam being used to produce electricity. We are not aware of DOE's views on the proposal nor its schedule for any consideration of it. We
