Dave,

We could not locate the following Davis-Besse NFPA 805 report on the Portal: Fire Ignition Frequencies (C-FP-013.10-008).

In addition, several F&O dispositions in Attachment V of the LAR refer to different sections of the Fire PRA Human Reliability Analysis (PRA-DB1-AL-R05 10-03) are not in the version of the document on the Portal. Let us know if this document has been updated.

These documents are being used to support the audit described in the NRC's letter to FENOC dated March 23, 2016 (ADAMS Accession No. ML16075A111).

Thanks,
