Subject: [External_Sender] Smith Ranch License Renewal Open Issue
Date: Thursday, June 30, 2016 4:56:26 PM

Doug,

While reviewing the Open Issues for the Smith Ranch License Renewal, the open issue regarding RAI 45 had a statement that Cameco would provide a response for this RAI by June 30, 2016. With today being June 30, 2016, a formal response to this RAI has not been developed. As with most of the recent health physics RAIs, Cameco is still working to see how to properly address this issue. Since no guidance has been put forth by the NRC regarding radon and radon measurements, along with the most recent request by industry to discuss health physics issues common to ISR facilities, Cameco's response to this RAI will be delayed until a later date.

If you have any questions regarding this matter, please let me know.

Mike
