**SUBJECT: NRC INSPECTION REPORT 07000036/2016001(DNMS) WESTINGHOUSE
ELECTRIC COMPANY (HEMATITE)**

Dear Ms. Fussell:

On June 3, 2016, the U.S. Nuclear Regulatory Commission (NRC) completed an inspection at the Westinghouse Hematite facility located in Festus, Missouri. The purpose of the inspection was to determine whether decommissioning activities were conducted safely and in accordance with NRC requirements. Specifically, the inspection focused on confirmatory surveys. At the conclusion of the inspection, the results were discussed with you and other member of your staff during an exit meeting on June 3, 2016.

This inspection examined activities conducted under your license as they relate to public health and safety, to the common defense and security, and to confirm compliance with the Commission's rules and regulations and with the conditions of your license. Within these areas, the inspection consisted of selected examination of procedures and representative records, observations of activities, and interviews with personnel.

No violations of NRC requirements were identified during the inspection.

In accordance with Title 10 of the *Code of Federal Regulations* (CFR) 2.390 of the NRC's "Rules of Practice," a copy of this letter and your response, if you choose to provide one, will be made available electronically for public inspection in the NRC's Public Document Room or from
