Dear Mr. Sheehan

The Plymouth Pilgrim Nuclear Power Station cannot be trusted to fix problems that the NRC has pointed out. It seems that rather than fix the problem they just let it get worse.

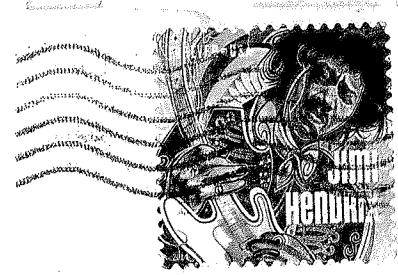

They are not going to pour money into a dying facility. They are showing that they are just coasting, running the plant down until they have a permanent shut down. Why pour money into a sieve?

I have three special reasons to be concerned. Their names are Rebecca, Tim and Christopher. They live within 5 miles of PNPS. They are my daughter, my son-in-law and my 2yr old grandson.

Please keep them safe. Please make Pilgrim fix their problems. Please set a fair date for your inspection. Don't let them go til next year especially in light of the fact that they did not clean up identified problems. Is this the way they are going to decommission PNPS with violations piled one on top of the other never fixing dangerous problems? Sincerely  
Jury Bassett
