Hi John,

I own you information and so does the NRC.

- 1) The NRC response to Nuclear Regulatory Commission Report 50-443/87-07 on November 12, 1987 involved the numerous unresolved cracks and leaks, BUT the “as built” failures and construction failures and as “as builder” staff not trained in ANSI standards required by UE&C....was scary years ago. The unresolved issues fail to be NRC followed after construction...and the plant passive issues were active, rightly?
- 2) The five cores from R. Conte in 2011 in an email has about the NRC and NextEra agreement to test the cores for tensile...NextEra did not test them. Where are they?

Debbie
