---

Dear Mr. Broadwell,

You must amend your State of California possession license before your exempt distribution license will be issued by the NRC. You must provide to the NRC an appropriately amended copy of your State of California license by October 1, 2016. If you have not provided a copy of your license to the NRC by this date, we will take action to discontinue our work on your license application.

The fee for your original license application was received on June 26, 2015, and the NRC applied this fee to your original application and to the current resubmittal of your application, because the resubmittal of your application was received within 12 months of the receipt of your license application fee. In the event that we discontinue work on your current license application, because 12 months has passed since the receipt of your license fee, please note that a new fee will be required before work by the NRC is performed on any future resubmittal of this application.

If you have further questions, please let me know.

Regards,  
Eric

**Subject:** [External\_Sender] RE: CSECO; Docket No. 030-38916

Hello again,

Time is of the essence for us to obtain the Exempt License, must we have this amendment before obtaining the license from the USNRC?

Can you enlighten us to what the next steps will be and a rough timeframe?

Thanks  
Doug

Dear Mr. Broadwell,

Thank you for your response to our request for additional information in an email dated July 1, 2016. In your response you indicated that you have requested an amendment of your State of California License No. 4147-01 concerning the manufacture, processing, or production of the K9 series of portable density gauges that will be distributed for use by license-exempt persons under 10 CFR 30.22 or the regulations of an Agreement State. Please inform us of the expected date when this amendment will be issued.

Kind regards,  
Eric
