Subject: [External_Sender] Re: NextEra - Seabrook's ASR [2016-SST-0548]

Fred,

I hope you editing my request to edit the second sentence in my email below. PAlso, we are still waiting for the spent fuel building one swallow core done Dec 2015. We asked numerous times over a year and a half what the core results were and the data? Where is it? I will go to Congress if you do not send it to C-10. The result that nextEra did the core and did not go it and if they did the results of the data.

A year and a half to not have ANY results from the NRC to our question requires Congress to demand it to you next week. Congress is aware you still have not responded to C-10.

Thank you,

Debbie
