Subject: [External_Sender] Re: NextEra - Seabrook's ASR [2016-SST-0548]

Hello Fred,

Did you edit the second sentence I edited? Please let me know today.

C-10 asked a year and a half the results of the core done in Seabrook's spent fuel building. It was a one swallow core done in Dec 15 2015. I asked numerous times in emails to various NRC staff and by phone. I need a answer now. Congress will request it to the NRC for us if the information of whether the core in the Seabrook spent fuel building was done in Dec 15 2015 or at all as reported and what the results were and the data?

Thank you,

Debbie
