Dear Ms. Forster:

Per our conversation of this date, we wish to make a change to our Broad Scope License Amendment request in the letter of May 5, 2016.

The first sentence of the second paragraph should be changed to "We request that we be permitted to send specimens to any lab which is capable of detecting uptake these radionuclides, and is licensed by the NRC or Agreement State to possess those radionuclides."

Please let me know if further information is required.

Sincerely,

A handwritten signature in cursive script that reads "Andrew G. Welding".

Andrew G. Welding  
Radiation Safety Officer
