Dennis Lawyer: **Mail Control #590762**

On April 19, 2016, I notified the NRC that Eastern Connecticut State University had decided to terminate its **Materials License 06-20971-01**. A compilation of our decommissioning data was then submitted with NRC Form 314 dated May 12, 2016. Following your initial review, additional information was requested.

I have made every effort to gather the additional information. The resulting documents are enclosed in this report for further review. I am hopeful that this submission will allow our license termination to continue moving forward.

Respectfully,

Gloria J. Colurso

Subject: Eastern Connecticut State University, Request for Additional Information Concerning Application for a License Amendment, Control 590762

Date: Wednesday, June 8, 2016 10:40:15 AM Eastern Daylight Time

From: Lawyer, Dennis <Dennis.Lawyer@nrc.gov>

To: Colurso, Gloria J. (Biology) <COLURSO@easternct.edu>

Dear Dr. Colurso,

This is in reference to your letter dated April 19 and NRC 314 form dated May 12, 2016, requesting for termination of Nuclear Regulatory Commission License No. 06-20971-01, Docket No. 03022168. In order to continue our review, we need the following additional information:

1. Contained with your NRC 314 form dated May 12, 2016, you provided disposal records as required by 10 CFR 20.2003 (disposals to the sanitary sewerage system) and 20.2005 (disposal of specific wastes including liquid scintillation cocktail and animal tissue). Please confirm that you have sent a copy of all the records as required by these regulations for all operations since the license was issued in March 18, 1986, or send in the remaining records.

2. Prior to termination of a license,10 CFR 30.35(g), 30.36(k)(4) and 30.51 require that you submit to the NRC certain records. Please submit the following records, or explain why such records are not applicable

    a. for unsealed materials with half-lives greater than 120 days, records for disposal made pursuant to 10 CFR 20.2002 (alternate disposal procedures, including burial authorized prior to January 28, 1981), , 20.2004 (incineration of wastes),), and 20.2103(b)(4), evaluations of effluent releases

    b. records important for decommissioning as described in 30.35(g). Examples of such records include but are not limited to: records of contamination, identifying the radionuclides, quantities and concentrations; as-built drawings and modifications of structures and equipment in restricted areas and locations of inaccessible contamination such as buried pipes; a single list, updated at least every 2 years, of areas to which access is limited for the purpose of radiation protection (restricted areas); and records related to the provision of financial assurance.

3. The disposal records to the sanitary sewerage system did not contain the information as required by 10 CFR 20.2003(a)(3). Please provide the average monthly volume of water released into the sewer and calculate the fraction and compare to the limit in table 3 of Appendix B to part 20 represented by discharges into sanitary sewerage.

4. NUREG-1757, Volume 1, Revision 2, "Consolidated Decommissioning Guidance Decommissioning Process for Materials Licensees," states for in Figure 8.1 for simplified survey procedures, "One hundred percent scanning of all surfaces in the area of the facility where licensed material was used or stored, using an appropriate radiation detection instrument (including scan sensitivity)." Please state the percentage of all surfaces were scanned for the surveys performed and the rate of survey speed that was performed.

5. In your May 15, 2012, renewal letter, you stated that you could use materials in Room 316, 332, 342, and 434 in which no survey data was submitted. Please submit survey data or state that radioactive materials were not used in these rooms.

6. You submitted surveys for specific isotopes in rooms 306, 306A, 315, 334, 335, 337, and a cold room. Please confirm that only these isotopes were used.

7. You have been licensed for I-125, in which no surveys were submitted. Please submit surveys where I-125 was used or confirm that there was no use of I-125 in the Science Building.

8. You performed surveys in a cold room, please confirm that this is room 337A or provide surveys of room 337A.

We will continue our review upon receipt of this information. Please reply to my attention at the Region 1 Office (Address below) and refer to Mail Control No. 590762. If you have technical questions regarding this letter, please call me at (610) 337-5366.

Your reply must be an originally signed and dated letter. The letter may be scanned and submitted as a pdf document attached to an email; or it may be transmitted by facsimile to (610) 337-5269; or it may be sent by regular mail. If we do not receive a reply from you within 30 calendar days from the date of this e-mail, we will assume that you do not wish to pursue your application OR amendment request.

Please respond by e-mail to acknowledge that you have received the e-mail request for additional information.

Region 1 Office Mailing Address: Licensing Assistance Team, US Nuclear Regulatory Commission Region I, 2100 Renaissance Boulevard, Suite 100, King of Prussia, PA 19406-2713.

Dennis Lawyer
U.S. NRC Region 1
Health Physicist
610-337-5366

1. Contained with your NRC 314 form dated May 12, 2016, you provided disposal records as required by 10 CFR 20.2003 (disposals to the sanitary sewerage system) and 20.2005 (disposal of specific wastes including liquid scintillation cocktail and animal tissue). Please confirm that you have sent a copy of all the records as required by these regulations for all operations since the license was issued in March 18, 1986, or send in the remaining records.

Eastern Connecticut State University
Radiation Records

Radionuclide	10 CRF Part 20, Appendix B, Table 3 Releases to Sewers μCi/ml Monthly Average Concentration	Conversion from μCi/ml to μCi/gallon
C-14	3 E-4	1.135
H-3	1 E-2	37.854
I-125	2 E-5	0.757
S-35	1 E-3	3.785

When more than one radionuclide is discharged, the total is less than unity.

Gross quantity does not exceed C-14 0.5 Curie/yr, H-3 1 Curie/yr, All others 0.5 Curie/yr.

Average monthly volume of water released on campus 400,000 gallons.
This is a **very conservative** estimate based on information provided by the University Facilities Department.

Radionuclide	Eastern CT State University Disposal Limits to Sewers μCi per month	Based on 400,000 gallons of water released per month on campus equals μCi/gallon
C-14	500	0.00125
H-3	2,500	0.00625
I-125	50	0.000125
S-35	2,500	0.00625

It is evident that the sewerage disposal limits set by the University are much lower than those permitted by 10 CFR Part 20. Furthermore, the amount of radionuclides that we actually release is typically below our University limits.

Depending on the year of our license, sewerage disposal limits have varied somewhat, but they have always been markedly below those permitted by 10 CRF Part 20.
See attachments.

EASTERN CONNECTICUT STATE UNIVERSITY

SUMMARY OF SEWERAGE LIMITS

LICENSE RENEWAL May 15, 2012 – August 31, 2022

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/MONTH *(page 30)*	
H-3	10 milliCi	2,500 microCi	400,000 gallons/month
C-14	10 milliCi	500 microCi	
S-35	100 milliCi	2,500 microCi	
I-125	500 microCi	50 microCi	

LICENSE AMENDMENT May 18, 2009 – June 30, 2012

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/MONTH *(page 30)*	
H-3	5 milliCi	2,500 microCi	400,000 gallons/month
C-14	5 milliCi	500 microCi	
S-35	100 milliCi	2,500 microCi	
I-125	500 microCi	50 microCi	

LICENSE RENEWAL May 23, 2002 – June 30, 2012

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/MONTH *(page 37)*	
H-3	5 milliCi	2,500 microCi	325,000 gallons/month
C-14	5 milliCi	500 microCi	
S-35	75 milliCi	2,500 microCi	
I-125	500 microCi	50 microCi	

LICENSE AMENDMENT August 1, 1998 – June 30, 2002

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/MONTH *(page 35)*	
H-3	5 milliCi	1,000 microCi	3,900,000 gallons/month
C-14	5 milliCi	500 microCi	
S-35	25 milliCi	750 microCi	
I-125	250 microCi	25 microCi	

LICENSE AMENDMENT July 10, 1992 – June 30, 1997 – June 30, 2002

Change in NRC Ruling extended same license to June 30, 2002

MAXIMUM ALLOWED	SEWERAGE DISPOSAL PERMITTED/MONTH
Same as 1991-97	Same as 1991-97

LICENSE RENEWAL February 5, 1991 – June 30, 1997

Still under review, NRC asked for more information December 3, 1991.

We responded March 23, 1992, which included sewerage limits below.

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/DAY *(page 31)*	
H-3	5 milliCi	1,000 microCi	2,500,000 gallons/month
C-14	6 milliCi	100 microCi	
S-35	25 milliCi	100 microCi	
Cl-36	500 microCi	10 microCi	
I-125	200 microCi	5 microCi	

LICENSE AMENDMENT June 1, 1989 – March 31, 1991

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/DAY
H-3	5 milliCi	Same as 1986-91
C-14	6 milliCi	
S-35	25 milliCi	
Cl-36	500 microCi	

LICENSE AMENDMENT June 19, 1986 – March 31, 1991

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/DAY
H-3	5 milliCi	Same as 1986-91
C-14	6 milliCi	
S-35	25 milliCi	
Cl-36	500 microCi	

"FIRST" LICENSE March 18, 1986 – March 31, 1991

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/DAY *(page 22)*
H-3	3 milliCi	No specific amounts listed. Just said
C-14	4 milliCi	as designated in 10 CFR Part 20.303.
Cl-36	500 microCi

TERMS AND CONDITIONS

A. TITLE: Upon inspection and acceptance at the disposal site by US Ecology and all appropriate regulatory authorities, title to the Waste which conforms to Company's representations herein shall thereupon transfer from the Customer and be vested in US Ecology.

B. WASTE PRODUCTS: Customer represents and warrants that data set forth in this Radioactive Waste Shipment & Disposal Manifest is true and correct in all respects and in accordance with all applicable governmental laws, rules, regulations and the designated facility license.

C. INDEMNIFICATION: Customer agrees to indemnify US Ecology, its officers, employees and agents against all loss and liability whatsoever if such loss or liability results from the failure of the Waste to conform in all material respects to the data supplied on the Radioactive Waste Shipment & Disposal Manifest or this shipment fails to meet the standards prescribed by the Department of Transportation or any other governmental agency having jurisdiction over such matters.

Disposal Manifest 2005

Philotechnics, Ltd.

Oak Ridge, TN

PHILOTECHNICS

November 18, 2005

Ms. Gloria Colurso
Eastern Connecticut State University
Biology Dept., Goddard Hall
83 Windham Street
Willimantic, CT 06226-2295

Subject: Shipment Receipt Acknowledgement

Dear Gloria:

In accordance with the requirements of 10 CFR 20, Appendix G, Section III, C.1., the attached signed manifest copy is provided as your notice of receipt and acceptance of the radioactive waste materials specified on the manifest. Manifest No. 0533-091405Pe was received at Pacific EcoSolutions (PEcoS) on October 12, 2005 and assigned Receipt No. LLR05-156.

This letter is acknowledgement of receipt only. Any manifest discrepancies found during unloading or processing will be reported at a later date.

Please contact me if you have any questions or require additional information. I can be reached at 888-RADWASTe or 865-285-3006 (direct), or via email at pseiber@philotechnics.com.

Sincerely,

Philotechnics, Ltd.

Kenneth Hansen

Subject: Shipment Receipt Acknowledgement

Dear Sir or Madam:

This letter is provided as certification that the waste on attached BOL #0533-032916PH consigned to Philotechnics, Ltd. was received on April 4, 2016.

Please contact me if you have any questions or require additional information. I can be reached at 888-RADWASTe or 865-285-3028 (direct), or via email at akbrown@philotechnics.com.

Sincerely,

Philotechnics, Ltd.

Amanda Brown

STRAIGHT BILL OF LADING

STRAIGHT BILL OF LADING – Short Form – Original – Not Negotiable Authorization No.

Shipper's No. 0533-032916PH

Carrier Philotechnics, Ltd. SCAC _____ Carrier's No. _____

Received, subject to the classifications and tariffs in effect on the date of this Bill of Lading:

at Willimantic, CT (City, State) Date: 03/29/16 From: Eastern Connecticut University (Company Name)

The property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated below, which said company (the word company being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its own road or its own water line, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the conditions not prohibited by law, whether printed or written, herein contained (as specified in Appendix B to Part 1035) which are hereby agreed to by the shipper and accepted for himself and his assigns.

2. Prior to termination of a license,10 CFR 30.35(g), 30.36(k)(4) and 30.51 require that you submit to the NRC certain records. Please submit the following records, or explain why such records are not applicable.

b. records important for decommissioning as described in 30.35(g). Examples of such records include but are not limited to: records of contamination, identifying the radionuclides, quantities and concentrations; as-built drawings and modifications of structures and equipment in restricted areas and locations of inaccessible contamination such as buried pipes; a single list, updated at least every 2 years, of areas to which access is limited for the purpose of radiation protection (restricted areas); and records related to the provision of financial assurance.

EASTERN CONNECTICUT STATE UNIVERSITY
RADIATION RECORDS

No Restricted Areas

Since its origin in 1986, there has been **no** contamination incident associated with our licensed program that has required the designation of a restricted area. Therefore, there are no corresponding records to submit.

Current Licensed Radioisotopes and Maximum Amount Permitted

Carbon-14	@ 10 milliCuries
Hydrogen-3	@ 10 milliCuries
Iodine-125	@ 500 microCuries
Sulfur-35	@ 100 milliCuries

Given the types and quantities of our radioisotopes, restricted areas are not a part of our program. It is noteworthy that the actual amount of radioisotopes that we typically have on hand is significantly lower than the maximum permitted.

Financial Assurance

See letter from James Howarth, Vice President for Finance and Administration, dated June 17, 2016.

EASTERN CONNECTICUT STATE UNIVERSITY

A Liberal Education. Practically Applied.

June 17, 2016

To Whom It May Concern:

Eastern Connecticut State University is a public higher education institution owned by the State of Connecticut with an annual budget in excess of $130.0 million.

As the Vice President for Finance and Administration I am responsible for managing the university's budget.

I hereby certify that Eastern Connecticut State University and the State of Connecticut would have sufficient resources in the unlikely event of an accident.

Sincerely,

James Howarth

Vice President for Finance and Administration

3. The disposal records to the sanitary sewerage system did not contain the information as required by 10 CFR 20.2003(a)(3). Please provide the average monthly volume of water released into the sewer and calculate the fraction and compare to the limit in table 3 of Appendix B to part 20 represented by discharges into sanitary sewerage.

Eastern Connecticut State University
Radiation Records

Radionuclide	10 CRF Part 20, Appendix B, Table 3 Releases to Sewers μCi/ml Monthly Average Concentration	Conversion from μCi/ml to μCi/gallon
C-14	3 E-4	1.135
H-3	1 E-2	37.854
I-125	2 E-5	0.757
S-35	1 E-3	3.785

When more than one radionuclide is discharged, the total is less than unity.

Gross quantity does not exceed C-14 0.5 Curie/yr, H-3 1 Curie/yr, All others 0.5 Curie/yr.

Average monthly volume of water released on campus 400,000 gallons.
This is a **very conservative** estimate based on information provided by the University Facilities Department.

Radionuclide	Eastern CT State University Disposal Limits to Sewers μCi per month	Based on 400,000 gallons of water released per month on campus equals μCi/gallon
C-14	500	0.00125
H-3	2,500	0.00625
I-125	50	0.000125
S-35	2,500	0.00625

It is evident that the sewerage disposal limits set by the University are much lower than those permitted by 10 CFR Part 20. Furthermore, the amount of radionuclides that we actually release is typically below our University limits.

Depending on the year of our license, sewerage disposal limits have varied somewhat, but they have always been markedly below those permitted by 10 CRF Part 20.
See attachments.

EASTERN CONNECTICUT STATE UNIVERSITY

SUMMARY OF SEWERAGE LIMITS

LICENSE RENEWAL May 15, 2012 – August 31, 2022

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/MONTH *(page 30)*	
H-3	10 milliCi	2,500 microCi	400,000 gallons/month
C-14	10 milliCi	500 microCi	
S-35	100 milliCi	2,500 microCi	
I-125	500 microCi	50 microCi	

LICENSE AMENDMENT May 18, 2009 – June 30, 2012

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/MONTH *(page 30)*	
H-3	5 milliCi	2,500 microCi	400,000 gallons/month
C-14	5 milliCi	500 microCi	
S-35	100 milliCi	2,500 microCi	
I-125	500 microCi	50 microCi	

LICENSE RENEWAL May 23, 2002 – June 30, 2012

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/MONTH *(page 37)*	
H-3	5 milliCi	2,500 microCi	325,000 gallons/month
C-14	5 milliCi	500 microCi	
S-35	75 milliCi	2,500 microCi	
I-125	500 microCi	50 microCi	

LICENSE AMENDMENT August 1, 1998 – June 30, 2002

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/MONTH *(page 35)*	
H-3	5 milliCi	1,000 microCi	3,900,000 gallons/month
C-14	5 milliCi	500 microCi	
S-35	25 milliCi	750 microCi	
I-125	250 microCi	25 microCi	

LICENSE AMENDMENT July 10, 1992 – June 30, 1997 – June 30, 2002

Change in NRC Ruling extended same license to June 30, 2002

MAXIMUM ALLOWED	SEWERAGE DISPOSAL PERMITTED/MONTH
Same as 1991-97	Same as 1991-97

LICENSE RENEWAL February 5, 1991 – June 30, 1997

Still under review, NRC asked for more information December 3, 1991.

We responded March 23, 1992, which included sewerage limits below.

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/DAY *(page 31)*	
H-3	5 milliCi	1,000 microCi	2,500,000 gallons/month
C-14	6 milliCi	100 microCi	
S-35	25 milliCi	100 microCi	
Cl-36	500 microCi	10 microCi	
I-125	200 microCi	5 microCi	

LICENSE AMENDMENT June 1, 1989 – March 31, 1991

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/DAY
H-3	5 milliCi	Same as 1986-91
C-14	6 milliCi	
S-35	25 milliCi	
Cl-36	500 microCi	

LICENSE AMENDMENT June 19, 1986 – March 31, 1991

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/DAY
H-3	5 milliCi	Same as 1986-91
C-14	6 milliCi	
S-35	25 milliCi	
Cl-36	500 microCi	

"FIRST" LICENSE March 18, 1986 – March 31, 1991

MAXIMUM ALLOWED		SEWERAGE DISPOSAL PERMITTED/DAY *(page 22)*
H-3	3 milliCi	No specific amounts listed. Just said
C-14	4 milliCi	as designated in 10 CFR Part 20.303.
Cl-36	500 microCi	

4. NUREG-1757, Volume 1, Revision 2, "Consolidated Decommissioning Guidance Decommissioning Process for Materials Licensees," states for in Figure 8.1 for simplified survey procedures, "One hundred percent scanning of all surfaces in the area of the facility where licensed material was used or stored, using an appropriate radiation detection instrument (including scan sensitivity)." Please state the percentage of all surfaces were scanned for the surveys performed and the rate of survey speed that was performed.

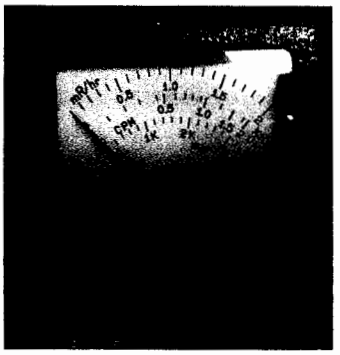
SAFETY SURVEYS OF LABORATORY FACILITIES

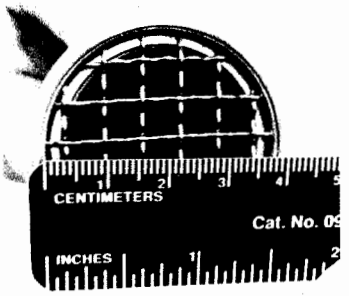
Geiger-Mueller Survey Meter (Calibrated annually):

Model 3, Serial # 43323, Ludlum Measurements, Inc., Sweetwater, TX 79556

The meter dial (Model 202-49) is dual scale with readings provided as 0-3.2K counts per minute and 0-2 millirem per hour. The meter provides multiplier ranges X0.1, X1, X10, and X100.

The probe detector (Model 44-7, Serial # PR-028749) has an indicated use for alpha and beta-gamma surveys. The window is 1.7 $\pm$ 0.3 mg per square centimeter mica. Active window area is approximately 6.4 square centimeters. Efficiency is 30% for alpha, 10% for C-14, and 1700 counts per minute per millirem per hour for Cs-137 gamma.





Please review the contents of our decommissioning booklet submitted with NRC Form 314 dated May 12, 2016. Wherever swipe surveys were conducted for laboratories, waste drums, counters, etc., Geiger-Mueller (GM) surveys were also performed and documented. These GM surveys were conducted at the surface of each designated object at a rate of approximately 8-10 inches per second. The GM surveys covered a major portion of each object, but not literally every square inch. Furthermore, because no scan showed readings above background at 0.02 mRem per hour, the final results were documented in each report with one common statement. Individual readings were not recorded for each item one-by-one. While these survey methods may not be adequate for license termination, I want to affirm that GM surveys were completed and recorded, however modest they may have been.

EASTERN CONNECTICUT STATE UNIVERSITY
RADIATION RECORDS
SAFETY SURVEYS OF LABORATORY FACILITIES

It is our understanding that additional GM surveys are NOT required for:

- H-3.
- I-125 that has gone through a minimum of ten half-lives.
  Last I-125 obtained was November 7, 2007.
  Furthermore, I-125 was never used for experiments in the Science Building.
- S-35 that has gone through a minimum of ten half-lives.
  Last S-35 obtained was March 8, 2012.

Additional GM surveys ARE enclosed for C-14 in Science Building rooms 306 and 306A.

Carbon-14 was **never** used for experiments in the Science Building.
The C-14 materials that we had in the Science Building were stored in a locked safe, within a locked refrigerator, in room 306 also locked. These same C-14 materials were subsequently disposed of into the sanitary sewerage system using the sink in room 306. *(Room 306A is for waste storage.)*

Since C-14 was never used for experimentation, the GM surveys focus on areas relevant to storage and disposal. Note that the sink and benchtops are stainless steel, which limits the absorption of C-14 into structural components.

Swipe surveys for C-14 were previously conducted in Science Building rooms 306 and 306A. These results have already been reported to the NRC with Form 314 dated May 12, 2016.

5. In your May 15, 2012, renewal letter, you stated that you could use materials in Room 316, 332, 342, and 434 in which no survey data was submitted. Please submit survey data or state that radioactive materials were not used in these rooms.

6. You submitted surveys for specific isotopes in rooms 306, 306A, 315, 334, 335, 337, and a cold room. Please confirm that only these isotopes were used.

8. You performed surveys in a cold room, please confirm that this is room 337A or provide surveys of room 337A.

EASTERN CONNECTICUT STATE UNIVERSITY
RADIATION RECORDS

From our current program description: **ITEM 9 FACILITIES AND EQUIPMENT**

A. Facilities, 1. Science Building, Third Floor and Fourth Floor

We listed rooms for storage and/or disposal of radioactive materials and radioactive waste. We listed additional rooms where we expected radioactive materials to be used for general teaching and research under proper supervision, with no long-term storage of materials or waste. As it turned out, not all the designated rooms were used for radioisotope studies.

Designated Rooms	Radioisotope Use	Primary Rad Function
306	C14, H3, I125, S35	Storage of materials Waste disposal Material preparation, but no extended experimental studies
306A	C14, H3, I125, S35	Waste storage
315	H3	Teaching/research
316	**NONE**	**NONE**
332	**NONE**	**NONE**

335	S35	Teaching/research
337	S35	Teaching/research
337A **COLDROOM**	S35	Teaching/research
342	**NONE**	**NONE**
434	**NONE**	**NONE**

The Biology Department moved into the new Science Building during the summer of 2008, where classes began with the Fall 2008 semester.

Prior to that, licensed activities (using all four radioisotopes) were conducted in Goddard Hall and Media Center Building. Decommissioning of those areas was conducted during 2008-2009 and was approved by the U.S. NRC and State of Connecticut, DEEP, Radiation Division.

C-14 and I-125 were never used for experiments in the Science Building. The C-14 and I-125 that we had in the Science Building were stored, never used, followed by sewerage disposal.

7. You have been licensed for I-125, in which no surveys were submitted. Please submit surveys where I-125 was used or confirm that there was no use of I-125 in the Science Building.

EASTERN CONNECTICUT STATE UNIVERSITY
RADIATION RECORDS
SAFETY SURVEYS OF LABORATORY FACILITIES

Iodine-125 was **never** used for experiments in the Science Building.
The I-125 materials that we had in the Science Building were stored in a locked safe, within a locked refrigerator, in room 306 also locked. These same I-125 materials were subsequently disposed of into the sanitary sewerage system using the sink in room 306. *(Room 306A is for waste storage.)*

The last date of I-125 obtained/used was November 2007.

Since I-125 was never used for experimentation, the swipe surveys focus on areas relevant to storage and disposal. Note that the sink and benchtops are stainless steel.

WORK DESCRIPTION
1 No Contamination to the instrument.
Perform routine maintenance by Perkin Elmer's specifications. Re-boot PC and log in under TSE. once in diagnostics I then check the belt motors, elevator motors, pin drives and clean the elevator body assembly. I then check the error log and elevator cycles. No errors reported. Ran the SNC protocol and these are the results:

C 14 efficiency: 93.44 %

H3 Efficiency: 64.73%
BKG: 10 cpm
3415 elevator cycles since August 7, 2008
Clean the filter in the rear of instrument to the exhaust fan for the detector assembly. Clean elevator pedestal, Ran diagnostics, check sensors, belt motors, check all fans , wipe down entire instrument.
