**SUBJECT: APPLICATION FOR RENEWAL OF THE NORTH ANNA POWER STATION
INDEPENDENT SPENT FUEL STORAGE INSTALLATION LICENSE NO.
SNM-2507 – ACCEPTED FOR REVIEW (CAC NO. L25121)**

Dear Mr. Heacock:

By letter dated May 25, 2016, Virginia Electric and Power Company (Dominion) submitted an application for renewal of License No. SNM-2507 for the North Anna Power Station Independent Spent Fuel Storage Installation. The current license expires on June 30, 2018. The submittal of the renewal application was timely per the requirements of 10 CFR 72.42(b). In the application, Dominion requested to renew the license for an additional 40 years. U.S. Nuclear Regulatory Commission (NRC) staff performed an acceptance review of your application to determine if the application contains sufficient technical information in scope and depth to allow the staff to conduct the detailed technical review.

This letter acknowledges acceptance of your application. The application appears to contain the information needed for the NRC staff to conduct a detailed technical review. We have established a schedule for the review. The schedule allows for the staff to complete its technical review and issue a request for additional information (RAI) in November 2016 and the license renewal in June 2017, based on you responding to the RAI in December 2016. If no RAI is needed, and based on the staff's evaluation, the approval may be issued at approximately that time. If an additional RAI is needed, the staff will keep you informed of any schedule changes. In general, no additional changes to the application should be submitted except for changes resulting from your response to an RAI.

If you have any questions regarding this matter, please contact me at (301) 415-7116 or Kristina.Banovac@nrc.gov.

Sincerely,

/RA/
