

**MATERIALS LICENSE**

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 37, 39, 40, 70 and 71, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

Licensee		In accordance with letter dated May 25, 2016,	4. Expiration Date: June 30, 2020
1. Orchard, Hiltz, & McCliment, Inc. (OHM)		3. License number: 21-32793-01 is amended in its entirety to read as follows:	5. Docket No.: 030-38284 Reference No.:
2. 929 Bridgeview South Saginaw, MI 48604			
6. Byproduct, source, and/or special nuclear material	7. Chemical and/or physical form	8. Maximum amount that licensee may possess at any one time under this license	9. Authorized use
A. Radium-226	A. Sealed Sources (Radium Chemical, Model Print No. 21.94)	A. 4.5 millicuries per source and 10 millicuries total	A. To be used in Seaman Nuclear Corporation Model C-75 portable gauging devices for measuring physical properties of materials.
B. Cesium-137	B. Sealed Sources (AEA Technology/QSA, Inc., Model CDCW556; Isotope Product Laboratories, Model HEG-137)	B. 9 millicuries per source and 63 millicuries total	B. To be used in Troxler Models 3430 and 3440 portable gauging devices for measuring physical properties of materials.
C. Americium-241	C. Sealed Sources (AEA Technology/QSA, Inc., Model AMNV.997; Isotope Product Laboratories, Model Am1.N02)	C. 44 millicuries per source and 308 millicuries total	C. To be used in Troxler Models 3430 and 3440 portable gauging devices for measuring physical properties of materials.
D. Cesium-137	D. Sealed Sources (AEA Technology/QSA, Inc., Model CDC.805; Isotope Product Laboratories, Model HEG-137)	D. 11 millicuries per source and 77 millicuries total	D. To be used in InstroTek, Inc. Model 3500 Xplorer portable gauging devices for measuring physical properties of materials.

**MATERIALS LICENSE  
SUPPLEMENTARY SHEET**

License Number

21-32793-01

Docket or Reference Number

030-38284

Amendment No. 10

6. Byproduct, source,  
and/or special nuclear  
material

E. Americium-241

7. Chemical and/or physical form

E. Sealed Sources (AEA  
Technology/QSA, Inc., Model  
AMN.V997; Isotope Product  
Laboratories, Model AM1.N02)

8. Maximum amount that licensee  
may possess at any one time  
under this license

E. 44 millicuries per source  
and 308 millicuries total

9. Authorized use

E. To be used in InstronTek, Inc. Model  
3500 Xplorer portable gauging devices  
for measuring physical properties of  
materials.

**CONDITIONS**

10. Licensed material may be used or stored at the licensee's facilities located at:

1. 424 Hancock Street, Hancock, Michigan, 49930
2. 929 Bridgeview South, Saginaw, Michigan, 48604
3. G3101 W. Bristol Road, Flint, Michigan, 48507
4. 1005 Corporate Drive, Mt. Pleasant, Michigan, 48858

Licensed material may be used at temporary job sites anywhere in the United States where the U.S. Nuclear Regulatory Commission maintains jurisdiction for regulating the use of licensed material, including areas of exclusive Federal jurisdiction within Agreement States.

If the jurisdiction status of a Federal facility within an Agreement State is unknown, the licensee should contact the Federal agency controlling the job site in question to determine whether the proposed job site is an area of exclusive Federal jurisdiction. Authorization for use of radioactive materials at job sites in Agreement States not under exclusive Federal jurisdiction shall be obtained from the appropriate state regulatory agency.

11. The Radiation Safety Officer for this license is Jack Niemi.

Amendment No. 10

12. Licensed material shall only be used by, or under the supervision and in the physical presence of, individuals who have received the training described in application dated March 23, 2010.
13. A. A. Sealed sources shall be tested for leakage and/or contamination at intervals not to exceed the intervals specified in the certificate of registration issued by NRC under 10 CFR 32.210 or by an Agreement State.
- B. In the absence of a certificate from a transferor indicating that a leak test has been made within the intervals specified in the certificate of registration issued by the NRC under 10 CFR 32.210 or by an Agreement State prior to the transfer, a sealed source received from another person shall not be put into use until tested.
- C. Sealed sources need not be leak tested if they are in storage, and are not being used. However, when they are removed from storage for use or transferred to another person, and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.
- D. The leak test shall be capable of detecting the presence of 0.005 microcurie (185 becquerels) of radioactive material on the test sample. If the test reveals the presence of 0.005 microcurie (185 becquerels) or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission in accordance with 10 CFR 30.50(c)(2), and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations.
- E. Tests for leakage and/or contamination shall be performed by persons specifically licensed by the Commission or an Agreement State to perform such services. In addition, the licensee is authorized to collect leak test samples but not perform the analysis; analysis of leak test samples must be performed by persons specifically licensed by the Commission or an Agreement State to perform such services.
- F. Records of leak test results shall be kept in units of microcuries and shall be maintained for 3 years.
14. Sealed sources or source rods containing licensed material shall not be opened or sources removed or detached from source rod or gauges by the licensee, except as specifically authorized.

Amendment No. 10

15. The licensee shall conduct a physical inventory every 6 months, or at other intervals approved by the NRC, to account for all sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 3 years from the date of each inventory, and shall include the radionuclides, quantities, manufacturer's name and model numbers, and the date of the inventory.
16. Each portable nuclear gauge shall have a lock or outer locked container designed to prevent unauthorized or accidental removal of the sealed source from its shielded position. The gauge or its container must be locked when in transport, storage or when not under the direct surveillance of an authorized user.
17. Any cleaning, maintenance, or repair of the gauges that requires detaching the source or source rod from the gauge shall be performed only by the manufacturer or other persons specifically licensed by the Commission or an Agreement State to perform such services.
18. Except for maintaining labeling as required by 10 CFR Part 20 or 71, the licensee shall obtain authorization from NRC before making any changes in the sealed source, device, or source-device combination that would alter the description or specifications as indicated in the respective Certificates of Registration issued either by the Commission pursuant to 10 CFR 32.210 or by an Agreement State.
19. The licensee shall either possess and use, or have access to and use, a radiation survey meter that meets the Criteria in the section entitled "Radiation Safety Program - Instruments" in NUREG - 1556, Vol. 1, Rev. 1, dated November 2001.

Amendment No. 10

20. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.
