REVISED NRC STAFF EXHIBIT LIST

Pursuant to the Commission's Scheduling Order of July 14, 2016, the staff of the U.S. Nuclear Regulatory Commission hereby provides in the Attachment to this filing its revised exhibit list for the mandatory hearing for Levy Nuclear Plant Units 1 and 2.¹ The Staff identified a necessary correction to NRC-002, "Draft Combined License." Final safety evaluation report section 11.2.4 includes an evaluation of License Condition 11-1, which relates to the radionuclide inventory of unpackaged wastes, and section 11.2.5 documents the language of this proposed condition. However, License Condition 11-1 was inadvertently omitted during the process of assembling the draft combined licenses from the conditions in the final safety evaluation report. If the Commission approves issuance of the combined licenses, the Staff plans to include License Condition 11-1 as condition 2.D(12)(d)12 on p. 14 of the licenses,² within the "Site- and Unit-Specific Conditions" [2.D(12)] to occur "Before initial fuel load"

¹ As described in the Staff Exhibit List filed June 21, 2016, due to the size and number of files in the Levy Nuclear Plant Units 1 and 2 COL application (Exhibit NRC-006A - NRC-006L), it was not practicable to mark the individual application documents or to file them through the NRC's E-filing system. The attached Staff Exhibit List provides the ADAMS accession number for the package of each part (Parts 1-11) of the COL application. These packages include all application documents. The Staff also provided the COL application on CD to the Commission, the Office of the Secretary, and the Office of Commission Appellate Adjudication.

² The draft combined licenses for LNP Units 1 and 2 are identical and, therefore, only one was filed as an exhibit. The revised draft combined license for LNP Unit 1 is referenced in the attached revised exhibit table. The revised draft combined license for LNP Unit 2 is accessible at ADAMS Accession No. ML16207A407.

[2.D(12)(d)]. Therefore, the Staff is submitting this updated exhibit as "NRC-002-R," which includes the described correction.

The Staff informed the applicant of this revision, and the applicant has no objection to the Staff making this correction.
